

List of tables

Table 1. 1 Biofloculants produced by different species and their unique properties.....	39
Table 2. 1 Colony morphology of isolates	81
Table 2. 2 NCBI Blast Analysis of 16S rRNA sequence of isolate CR4	87
Table 2. 3 List of peptides detected by LC MS/MS analysis of purified CR4 protein.	103
Table 3.1 Plackett Burman analysis for biofloculant production by <i>B.cereus</i> CR4	113
Table 3. 2 Different media used for the cultivation of <i>Scenedesmus</i>	115
Table 3. 3 List of nutrients selected for Plackett Burman analysis for growth of <i>Scenedesmus</i> sp.	116
Table 3. 4 Plackett Burman design and analysis for biofloculant production by <i>B.cereus</i> CR4...	124
Table 3. 5 F test for Plackett Burman analysis of the optimization of media for biofloculant production by <i>B.cereus</i> CR4.	125
Table 3. 6 Experimental results of media optimization for biofloculant production by <i>B.cereus</i> CR4 using central composite design	127
Table 3. 7 ANOVA analysis for media optimization for biofloculant production by <i>B.cereus</i> CR4 using CCD.	128
Table 3. 8 Optimization of kaolin flocculation by purified amyloid biofloculant CR4 by central composite design.	133
Table 3. 9 ANOVA analysis for optimization of kaolin flocculation by amyloid biofloculant CR4 using CCD.....	134
Table 3. 10 ANOVA analysis of kaolin floc size by CCD.....	135
Table 3. 11 Plackett Burmann analysis of different media components for growth of <i>Scenedesmus</i>	141
Table 3. 12 F test for Plackett Burman analysis of the optimization of media for growth of <i>Scenedesmus</i> sp.	141
Table 3. 13 Central composite design for the optimization of NaNO ₃ and ZnSO ₄ concentrations for the % growth of <i>Scenedesmus</i>	142
Table 3. 14 ANOVA analysis for the media optimization for cultivation of <i>Scenedesmus</i>	143
Table 3. 15 Design of experiment and analysis for optimization of <i>Scenedesmus</i> sp. flocculation by <i>B. cereus</i> CR4 using CCD.....	146
Table 3. 16 ANOVA analysis for Optimization of <i>Scenedesmus</i> sp. flocculation using CCD	147
Table 3. 17 ANOVA analysis for optimization of <i>Scenedesmus</i> floc size by CCD.....	148
Table 3. 18 Optimization of Factors affecting cell viability of <i>Scenedesmus</i> sp.by CCD.	157
Table 3. 19 Optimization of cocultivation conditions for flocculated growth of <i>Scenedesmus</i>	165
Table 3. 20 Optimization of flocculation conditions of the continous reactor <i>B. cereus</i> CR4.....	174
Table 3. 21 ANOVA analysis for optimization of flocculation conditions for continous reactor ..	174
Table 4. 1 Biofilm form and distribution of TasA in various <i>Bacillus</i> sp	199
Table 4. 2 Summary chapter 4.	205
Table 5. 1 BLAST analysis of the amyloid gene from <i>B. cereus</i> CR4 cloned in plasmid pVS72 showing flocculation activity.	218
