

Table of Contents

Chapter 1. Introduction

1.1 Medicinal Plants: Uses, Diversity	1
1.2 Need for Conservation of Medicinal Plants	3
1.2.1 <i>In situ</i> Conservation	3
1.2.2 <i>Ex situ</i> Conservation.....	4
1.3 Plant Tissue Culture Technique	4
1.3.1 Callogenesis	6
1.3.2 Organogenesis	6
1.3.3 Somatic Embryogenesis	8
1.4 Importance of Secondary Metabolite	9
1.5 Elicitation of Important Metabolites	11
1.6 Rational for Selection of Species	13
1.6.1 <i>Leptadenia reticulata</i> (Retz.) Wight and Arn	17
1.6.2 <i>Tylophora indica</i> (Burm. F.) Merrill.....	19
1.7 Objectives.....	21

Chapter 2. Review of Literature

2.1 Regeneration Studies.....	22
2.1.1 Shoot Regeneration from Leaf Explant.....	22
2.1.2 Somatic Embryogenesis from Leaf Explant.....	26
2.1.3 Development of Somatic Embryos.....	29
2.1.4 Axillary Shoot Proliferation from Nodal Explant	30
2.1.5 Regeneration through Nodal Derived Callus	33
2.1.5.1 <i>Indirect Organogenesis</i>	33
2.1.5.2 <i>Somatic Embryogenesis</i>	34
2.1.6 Rooting of <i>In vitro</i> Shoots.....	34
2.1.7 <i>In vitro</i> Studies on Selected Plants.....	35
2.1.7.1 <i>Leptadenia reticulata</i>	35
2.1.7.2 <i>Tylophora indica</i>	37
2.2 Phytochemical Analysis	39
2.2.1 Chemical Profiling of <i>In vitro</i> Cultures.....	39
2.2.2 Selection of Secondary Metabolites	42
2.2.2.1 <i>Medicinal Properties of p-Coumaric Acid</i>	42

2.2.2.2 Quantification of <i>p</i> -Coumaric Acid.....	43
2.2.2.3 Medicinal Properties of Llupeol.....	44
2.2.2.4 Quantification of Lupeol	46
2.2.3 Elicitation of Targeted Metabolites.....	46
2.2.4 Elicitation of Metabolites using YE and SA	48

Chapter 3. Materials and Methods

3.1 Development of <i>In vitro</i> Cultures.....	51
3.1.1 Plant Material	51
3.1.2 Glasswares and Plasticwares.....	51
3.1.3 Instruments	52
3.1.4 Chemicals	52
3.1.4.1 MS Salts Stock	52
3.1.4.2 Plant Growth Regulators.....	52
3.1.4.3 Stocks of Plant Growth Regulators	54
3.1.4.4 Antibiotics.....	54
3.1.4.5 Other Chemicals.....	54
3.1.5 MS Media Preparation	55
3.1.6 Establishment of <i>In vitro</i> Cultures	55
3.1.6.1 Antibacterial Assay	55
3.1.6.2 Plant Material and Treatment.....	56
3.1.6.3 Aseptic Manipulations.....	56
3.1.6.4 Culture Media	56
3.1.6.5 Hardening and Acclimatization of Plantlets	59
3.1.7 Culture Conditions	59
3.2 Phytochemical Analysis	60
3.2.1 Glasswares and Plasticwares.....	60
3.2.2 Instruments	60
3.2.3 HPTLC Fingerprint of <i>In vitro</i> Samples.....	60
3.2.3.1 Chemicals and Reagent Preparation	61
3.2.3.2 Plant Material	61
3.2.3.3 Preparation of Extract	62
3.2.3.4 Mobile Phases and TLC Plate Development.....	62
3.2.4 Standard Curve Preparation	63

3.2.4.1 Standard Curve of <i>p</i> -Coumaric Acid and HPTLC Method Validation	63
3.2.4.2 Standard Curve of Lupeol	63
3.2.5 Quantification of Selected Metabolites	64
3.2.5.1 <i>p</i> -Coumaric Acid	64
3.2.5.2 Lupeol.....	64
3.2.6 Elicitation of Metabolites	64
3.2.6.1 Chemicals	64
3.2.6.2 Elicitor Stock Preparation.....	64
3.2.6.3 Culture Establishment	65
3.2.6.4 Extraction and Quantification.....	66
3.3 Statistical Analysis	66

Chapter 4. Results and Discussion

4.1 Development of <i>In vitro</i> Cultures.....	67
4.1.1 Antibacterial Assay	67
4.1.2 Leaf Explant	68
4.1.2.1 Effect of PGRs on Callus Growth and Morphology.....	69
4.1.2.2 Synergistic Effect of Cytokinins and Auxins on Callus Growth and Morphology.....	71
4.1.2.3 Synergistic Effect of PGRs on Somatic Embryogenesis	76
4.1.2.4 Development of Somatic Embryos.....	82
4.1.3 Nodal Explants	84
4.1.3.1 Effect of Individual Cytokinins on Shoot Regeneration	84
4.1.3.2 Synergistic Effect of Cytokinins on Shoot Regeneration	85
4.1.3.3 Elongation of Shoots	89
4.1.4 Rooting of shoots	92
4.2 Phytochemical Analysis	94
4.2.1 HPTLC Fingerprint	94
4.2.1.1 Hexane Extract.....	94
4.2.1.2 Ethyl acetate Extract	101
4.2.1.3 Methanol Extract.....	109
4.2.2 Quantitative Analysis	118
4.2.2.1 Standard Curve for <i>p</i> -Coumaric Acid and HPTLC Method Validation.....	118
4.2.2.2 Quantification of <i>p</i> -Coumaric Acid.....	120
4.2.3 Elicitation of <i>p</i> -Coumaric Acid.....	123

4.2.3.1	<i>Callus Growth Determination</i>	123
4.2.3.2	<i>p-Coumaric Acid Content in Control Callus Culture</i>	124
4.2.3.3	<i>Effect of Yeast Extract and Salicylic Acid on Callus Biomass and p-Coumaric Acid Content</i>	124
4.3	Establishment of Cultures	129
4.3.1	Leaf Explant	129
4.3.1.1	<i>Effect of Individual PGRs</i>	129
4.3.1.2	<i>Synergistic Effect of PGRs</i>	130
4.3.1.3	<i>Development of Plantlets Derived through Somatic Embryos</i>	146
4.3.2	Nodal Explants	149
4.3.2.1	<i>Effect of Individual Cytokinins on Axillary Shoot Regeneration</i>	149
4.3.2.2	<i>Effect of Synergistic Cytokinins on Axillary Shoot Regeneration</i>	149
4.3.2.3	<i>Histology of SEs</i>	158
4.3.3	Effect of PGRs on Rooting of Shoots	158
4.3.4	Hardening of Plantlets.....	162
4.4	Phytochemical Analysis	165
4.4.1	HPTLC Profiling.....	165
4.4.1.1	<i>Hexane Extract</i>	165
4.4.1.2	<i>Ethyl Acetate Extract</i>	174
4.4.1.3	<i>Methanol Extract</i>	182
4.4.2	Quantification of Lupeol	190
4.4.3	Elicitation of Lupeol using Elicitors	193
4.4.3.1	<i>Effect of Yeast Extract on Shoot Biomass and Lupeol Content</i>	194
4.4.3.2	<i>Effect of Salicylic Acid on Shoot Biomass and Lupeol Content</i>	198

Chapter 5. Summary

5.1	Development of <i>In vitro</i> Cultures for <i>L. reticulata</i>	205
5.1.1	Leaf Explants	205
5.1.2	Nodal Explants	206
5.1.3	Rooting of Shoots.....	206
5.2	Phytochemical Analysis	206
5.2.1	HPTLC Fingerprint	206
5.2.2	Quantitative Analysis	207
5.2.3	Elicitation of <i>p</i> -Coumaric Acid.....	207

5.3 Development of <i>In vitro</i> Cultures for <i>T. indica</i>	207
5.3.1 Leaf Explants	207
5.3.2 Nodal Explants	208
5.3.3 Rooting of Shoots and Hardening	208
5.4 Phytochemical analysis for <i>T. indica</i>	209
5.4.1 HPTLC Fingerprint	209
5.4.2 Quantitative Analysis	209
5.4.3 Elicitation of Lupeol.....	209
 Chapter 6. References.....	 211
