

LIST OF TABLES

TABLE NO	TABLE TITLE	PAGE NO
METHODS AND MATERIALS		
3.1	Indicators and Tools for data collection for Phase I	31
3.2	Indicators and Tools for data collection for Phase II	34
3.3	Details of the intervention Activities proposed under PPP	40
3.4	Tools and Techniques used in the planned intervention activities	45
3.5	Indicators and Tools for Impact Analysis Phase III	47
PHASE I RESULTS AND DISCUSSION		
4.1.1	Demographic Profile of Anganwadi Functionaries	50
4.1.2	Awareness among Anganwadi Functionaries regarding the objectives and beneficiaries of ICDS	52
PHASE II RESULTS AND DISCUSSION		
4.2.1	Socio-Demographic characteristics of study population	65
4.2.2	Mean Weight and Height of children	68
4.2.3	Nutritional status of Children by weight-for-age (WAZ) Z Score Values	70
4.2.4	Nutritional status of Children by weight-for-age (HAZ) Z Score Values	72
4.2.5	Nutritional status of Children by Weight-for-Height (WHZ) Z Score Values	74
PHASE III RESULTS AND DISCUSSION		
4.3.1	Intervention Activities to Improve KAP of AWWs and Infrastructure of the AWC	85
4.3.2	Impact of PPP on knowledge of AWWs on IYCN	86
4.3.3	Change in knowledge of AWWs regarding feeding during and after illness	89
4.3.4	Changes in KAP of AWWs with regards to ICDS Services	90
4.3.5	Intervention Activities to Improve KAP Pertaining to IYCN Practices among Mothers of Children Under 5 Years of Age	97
4.3.6	Changes in Breast Feeding Practices of Mothers Post Intervention	99

4.3.7	Changes in Perception of Water Feeding and Top Milk Feeding Practices of Mothers Post Intervention	102
4.3.8	Changes in Perception of on Demand Feeding and Adequacy in terms of Quality Feeding Practices of Mothers Post Intervention	104
4.3.9	Changes in Perception of Mothers Regarding Complementary Feeding Practices Post Intervention	106
4.3.10	Changes in Perception of Mothers Regarding Active Feeding	109
4.3.11	Changes in Feeding Practices during and After Illness Post Intervention	110
4.3.12	Impact of Intervention on Knowledge, Attitude and Practices regarding IYCN of mothers in Experimental Group	111
4.3.13	Overview of the Intervention Activities under PPP to Improve Nutritional Status of Children Under 5 Years of Age	112
4.3.14	Proportion (%) of children in underweight category pre and post intervention by study groups and gender	117
4.3.15	Intervention impact in terms of absolute change in proportion of underweight (WAZ) category by age and gender	120
4.3.16	Proportion (%) of children in stunting category pre and post intervention by study groups and gender	122
4.3.17	Intervention impact in terms of absolute change in proportion of stunting (HAZ) category by age and gender	125
4.3.18	Proportion (%) of children in wasting category pre and post intervention by study groups and gender	128
4.3.19	Intervention impact in terms of absolute change in proportion of wasting (WHZ) category by age and gender	130
4.3.20	Impact of PPP Intervention on Nutritional Status of Children 0 – 60 Months	131
4.3.21	Changes in Morbidity Profile of the Children U-5 Post Intervention	137
4.3.22	Impact of Intervention on morbidity profile of the beneficiaries U – 5 in experimental group	138
