Figure 1.1	Location map of study area in Raniganj Coal Field, West Bengal, India	4
Figure 1.2	Flow chart on Methodology	9
Figure 2.1	Map showing the distribution of Gondwana basins in Peninsular India	26
Figure 3.1	Geological map of Raniganj Field	37
Figure 3.2	Geological Map of Chalbapur-Mahishmura Area showing the borehole locations	38
Figure 3.3	Barakar lithology at borehole R#8	40
Figure 3.4	A generalized litho column of the cliff section (Location: Nunia Nala).	42
Figure 3.5	Borehole Lithologs showing litho units of Barren Measures and Barakar	46
Figure 3.6	Log correlation profile showing the Barren Measures litho units	47
Figure 3.7	Fence diagram presents the lateral continuity and subsurface geology of the area.	48
Figure 3.8 A	W-E trending profile along R#1, R#2, R#3, R#4.	48
Figure 3.8 B	SW- NE trending profile along R#9, R#4, R#6.	49
Figure 3.9	Structure contour map on the bottom of Barren Measures Formation.	50
Figure 3.10	Isopach map of Barren Measures Formation.	50
Figure 3.11	Mineral composition of Barren Measure shale for different depth interval of B#1	60
Figure 3.12	Mineral composition of Barren Measure shale for different depth interval of B#2	60
Figure 3.13	Mineral composition of Barren Measure shale for different depth interval of B#3	61
Figure 3.14	Mineral composition of Barren Measure shale for different depth interval of B#4	61
Figure 4.1	Cross plots of Generation potential (GP) versus TOC.	77
Figure 4.2	Cross plot between S2 versus TOC.	78
Figure 4.3	Modified Van Krevelen diagram indicating the kerogen type for Barren Measures Shale.	80
Figure 4.4	HI versus Tmax cross plot.	81

Figure 4.5	Cross plot of remaining hydrocarbon potential (S ₂) and TOC (wt. %) for Barren Measures shales.	82
Figure 4.6	T _{max} versus Production Index.	83
Figure 4.7	Depth versus calculated maturity values of Barren Measures	84
Figure 4.8	Depth versus hydrocarbon generation stages	85
Figure 4.9	S ₁ versus TOC (wt %) cross plot shows all the samples are in the zone of indigenous hydrocarbon	86
Figure 4.10	Depth versus S ₁ /TOC graph.	87
Figure 5.1	Plots of porosity and permeability measurement	90
Figure 5.2	Grain density and Porosity relationship	91
Figure 5.3	Experimental X-ray CT apparatus	98
Figure 5.4	CT slices showing the internal heterogeneity of sample 1, depth 155m	101
Figure 5.5	Microcomputer tomogram (m CT) images showing pores and micro fractures in different Z slices of XY plane	103
Figure 5.6	Segmented images of tomograms , depth 155m; B#1	104
Figure.5.7	Segmented image of tomogram, 155.1m depth,B#1	104
Figure 5.8	Pore space in Barren Measures shale, depth 185m	105
Figure 5.9	3D internal microstructures of Barren Measures shale	105
Figure 5.10	TEM images of nano scale pores in Barren Measure shale.	106
Figure 5.11	Typical isotherm shape	108
Figure 5.12	The four hysteresis shapes of adsorption isotherm usually found by subcritical N ₂ adsorption	109
Figure 5.13	N ₂ adsorption isotherms Barren Measures shale	110
Figure 5.14	BJH Pore size distribution of Barren Measures shale.	111

List of Plates

**Page
No**

Plate 3.1	The Barren Measures exposes along Nunia nala section.	42
Plate 3.2	Lithofacies and structures in Barren Measures Formation	44
Plate 3.3	Core samples of Barren Measures, borehole B#1	52
Plate 3.4	Cross section view of core samples of Barren Measures, borehole B#1	53
Plate 3.5	Photomicrographs of Barren Measures shale	55
Plate 3.6	Photomicrographs of Barren Measure shale	56
Plate 3.7	Photomicrograph shows the compaction effect on the rock.	65
Plate 3.8	Photomicrograph shows ironstone shale	66
Plate 3.9	Photomicrograph shows the coarse grains in Barren Measures shale	67
Plate 3.10	Photomicrograph shows the well sub rounded fine grains oriented parallel	68
Plate 3.11	SEM images showing diagenesis effects.	69
Plate 5.1	Photomicrograph of Primary pores in Barren Measures shale	92
Plate 5.2	Photomicrograph of pore type in Barren Measures shale	93
Plate 5.3	Photomicrograph of Secondary pores in Barren Measures shale	94
Plate 5.4	Both intragranular and matrix pores in Barren Measures shale	95
Plate 5.5	Pores associated with organic matter.	96
Plate 5.6	Photomicrograph of highly fractured zone	97

List of Tables
