

List of Tables

Table No.		Page No.
2.1	Pre-Cambrian Stratigraphic framework of the Aravalli Mountain Belt; (after Heron, 1953).	11
2.2	Classification of the Aravalli Supergroup (After Gupta et al., 1980; 1992)	12
2.3	Proterozoic Succession of Gujarat (after Merh, 1995)	13
2.4	Stratigraphy of the Aravalli rocks in and around Champaner region; (After Srikarni and Das, 1996).	28
3.1	Litho- stratigraphic succession of the rocks in and around Champaner region (modified after Srikarni and Das, 1996).	35
4.1	AMS data of the quartzites of the Champaner Group.	94
5.1	Mineral chemistry data of ilmenite from three phyllite samples.	109
5.2	Time relationship between crystallization and deformation of various minerals in meta-pelites of the study area. The former part of the table indicates the mineral development due to regional metamorphism, where as the later enumerates the grain growth due to syn-to-post granite emplacement.	136
6.1	Fundamental resonant frequency f_0 , f_1 and f_2 for station 1 to 32 across Narukot Dome and in its western extension along a WNW profile.	145
7.1	Modal compositions of various granite samples in and around Champaner Group.	152
7.2	(a) Major oxides and (b) Trace element concentration in granites.	154
7.3	Zircon Saturation Temperature	163
8.1	Summary of deformation events recorded in neighbouring Precambrian supracrustals and its relationship with the study area.	168
