

CONTENTS

	<u>DESCRIPTION</u>	<u>PAGE NO.</u>
Chapter 1	INTRODUCTION	(1 – 7)
	Research Background	2
	Aims and Objectives	4
	Outline of the Study	5
	Probable Outcomes	7
Chapter 2	STUDY AREA	(8 – 16)
	The Kim River Watershed	9
	Communication Network	10
	Climatic Conditions	11
	Water Resources	13
	Soils	13
	Demographic Attributes	14
	Human resources	14
	Agriculture	15
	Industries	15
Chapter 3	GEOLOGICAL FRAMEWORK	(17 – 25)
	Geological Setup	18
	Lithostratigraphic Setup	19
Chapter 4	TERRAIN CHARACTERISTICS	(26 – 46)
	Physiography	27
	Landforms	29
	Drainage Characteristics	39
	Land Use System	41
Chapter 5	SOIL REGIME	(47 – 72)
	Regional Soil Resources	47
	Soil Sampling	48
	Basic Soil Characteristics	49
	Soils of the Kim Watershed	54
	Chemical Characteristics of the Soils	55
	Status of Various Soil Types in the Kim River Basin	63

Chapter 6	HYDROMETEROLOGY	(73 – 91)
	Meteorology	74
	Surface Water Hydrology	80
	Surface Runoff	89
Chapter 7	GROUNDWATER REGIME	(92 – 134)
	Groundwater Occurrence	93
	Well Inventory and Groundwater sampling	94
	Hydrogeological Characterization of the Study Area	95
	Groundwater level Fluctuations	100
	Seasonal Changes in Groundwater Levels	100
	Secular Changes in Groundwater Levels	103
	Impact of Irrigation on Groundwater Regime	110
	Groundwater Resource Potential	116
	Groundwater Chemistry	118
Chapter 8	MEASUREMENTS OF SUSTAINABILITY	(135 – 159)
	Water Footprints	136
	Types of Water Footprints	137
	Water Footprints of the Kim River Basin	139
	Ecological Footprints	153
	Ecological Footprints of the Kim River Basin	156
Chapter 9	ENVIRONMENTAL STATUS AND MANAGEMENT STRATEGIES	(160 – 168)
	Water Footprints	161
	Ecological Footprints	164
	Footsteps to Sustainability	165
