Certificate-1 . . . . .	i
Certificate-2 . . . . .	ii
Dedication . . . . .	iv
Declaration . . . . .	v
Acknowledgement . . . . .	vi
<b>1 Introduction</b>	<b>1</b>
1.1 Historical Background . . . . .	1
1.2 Preliminaries . . . . .	3
1.3 Properties . . . . .	5
1.4 Caputo Derivative of some fundamental function . . . . .	6
1.5 Mittag-Leffler Function . . . . .	8
1.6 Laplace Transform . . . . .	9
1.6.1 Laplace transform of the basic fractional operators . . . . .	9
1.6.2 Laplace transform of Mittag-Leffler Function . . . . .	11
1.7 Fourier Transform and Inverse Fourier Transform . . . . .	12
1.8 Solution Representation . . . . .	14
1.9 Application of fractional derivative . . . . .	15
1.10 Research work . . . . .	20
1.10.1 Chapter One . . . . .	20
1.10.2 Chapter Two . . . . .	21
1.10.3 Chapter Three . . . . .	21

1.10.4 Chapter Four . . . . .	22
1.10.5 Chapter Five . . . . .	22
1.10.6 Chapter Six . . . . .	23
<b>2 Existence and uniqueness of non-local Cauchy problem for fractional differential equation on Banach space</b>	<b>24</b>
2.1 Introduction . . . . .	25
2.2 Notations . . . . .	26
2.3 Equation with classical condition . . . . .	26
2.4 Equation with non-local condition . . . . .	30
2.5 Example . . . . .	34
2.6 Remark . . . . .	34
2.7 Conclusion . . . . .	35
<b>3 Nonlinear Cauchy problem for abstract impulsive fractional quasilinear evolution equation with delay</b>	<b>36</b>
3.1 Introduction . . . . .	37
3.2 Notations . . . . .	37
3.3 Equation with classical condition . . . . .	38
3.4 Equation with nonlocal condition . . . . .	42
3.5 Example . . . . .	46
3.6 Remark . . . . .	46
<b>4 Congruency between classical and mild solutions of Caputo fractional impulsive evolution equation on Banach Space</b>	<b>47</b>
4.1 Introduction . . . . .	48
4.2 <b>Notations</b> . . . . .	49
4.3 Mild Solution . . . . .	49
4.3.1 Assumptions . . . . .	50
4.3.2 Remarks . . . . .	53

4.4	Classical Solution . . . . .	54
4.5	Example . . . . .	61
4.6	Discussion . . . . .	62
4.7	Conclusion . . . . .	62
<b>5</b>	<b>Congruence between Mild and Classical Solutions of Generalized Fractional Impulsive Evolution Equation</b>	<b>63</b>
5.1	Introduction . . . . .	64
5.2	Mild Solution . . . . .	65
5.3	Classical Solution . . . . .	68
5.4	Congruence between Classical and Mild Solutions . . . . .	73
<b>6</b>	<b>Existence Results of Non-Instantaneous Impulsive Fractional Integro-differential Equation</b>	<b>75</b>
6.1	Introduction . . . . .	76
6.2	Preliminaries . . . . .	77
6.3	Equation with Local Conditions . . . . .	78
6.4	Equation with Nonlocal Conditions . . . . .	84
6.5	Conclusion . . . . .	92
<b>7</b>	<b>Existence and uniqueness of solutions of fractional order hybrid differential equations with nonlocal conditions</b>	<b>93</b>
7.1	Introduction . . . . .	93
7.2	<b>Notations</b> . . . . .	94
7.3	Assumptions . . . . .	96
7.4	Main Results . . . . .	96
	<b>Bibliography</b>	<b>100</b>
	<b>Appendices</b>	<b>112</b>

<b>A List of Publication and communicated papers</b>	<b>113</b>
<b>B List of Papers Presented</b>	<b>115</b>
<b>C Future scope</b>	<b>116</b>
