

Contents

1	Introduction and preliminaries	1
1.1	Introduction and motivation	1
1.2	Notations and definitions	3
1.2.1	Notations and definitions for functions of one variable . . .	4
1.2.2	Notations and definitions for functions of two variables . .	11
1.2.3	Notations and definitions for functions of N –variables . .	20
1.3	Recent development and layout of the thesis	26
2	Basic properties of classes of functions of generalized bounded variations	35
2.1	New results for functions of one variable	35
2.2	New results for functions of two variables	42
2.3	New results for functions of N –variables	49
3	Basic properties of functions of p–bounded variation in the mean	52
3.1	New results for functions of two variables	52
4	Fourier coefficients properties of functions of generalized bounded variations	58
4.1	Order of magnitude of multiple Fourier coefficients of functions of generalized bounded variations	58
4.1.1	New results for functions of two variables	59
4.1.2	New results for functions of N –variables	71

4.2	Absolute convergence of multiple Fourier series of functions of generalized bounded variations	73
4.2.1	New results for functions of two variables	74
4.2.2	New results for functions of N–variables	86
5	Walsh–Fourier coefficients properties of functions of generalized bounded variations	89
5.1	Order of magnitude of Walsh–Fourier coefficients of functions of generalized bounded variations	89
5.1.1	New result for functions of one variable	89
5.1.2	New results for functions of two variables	92
5.1.3	New results for functions of N–variables	99
