

Contents

Contents	I
List of Figures	IV
List of Tables	VII
1 Introduction	15
1.1 Introduction	15
1.2 Compact Stars	18
1.3 Strange Stars	19
1.4 The Energy-Momentum Tensor	19
1.4.1 Perfect Fluid	19
1.4.2 Electromagnetic Field	20
1.4.3 Anisotropic Fluid Distribution	21
1.5 Some Important Spacetime Metrics	25
1.5.1 Spheroidal Spacetime Metric	25
1.5.2 Pseudo-Spheroidal Spacetime Metric	27
1.5.3 Paraboloidal Spacetime Metric	28
1.6 Karmarkar Condition	29
1.7 Einstein's Field Equations...	30
1.7.1 Field Equations for Anisotropic Fluid Distribution	32
1.7.2 Field Equations for Anisotropic Charged Fluid Distributions	33
1.8 Elementary Criteria...	34
1.9 Layout of the thesis	38
2 Modified Finch and Skea stellar model compatible with observational data	42
2.1 Introduction	42
2.2 Modified Finch and Skea model	45

2.3	Boundary Conditions	49
2.4	Bounds on the model parameters	50
2.4.1	Stability	51
2.5	Physical analysis	52
2.6	Discussion	59
3	Compact stars on pseudo-spheroidal spacetime compatible with ob-	
	servational data	60
3.1	Introduction	60
3.2	Spacetime metric	63
3.3	Anisotropic Model 1	65
3.4	Bounds for Model Parameters	69
3.5	Compact Star Models	72
3.6	Discussion	74
3.7	Anisotropic Model 2	79
3.8	Physical Analysis	81
3.9	Application to Compact Stars...	83
4	Compact stars with charged distributions on pseudo-spheroidal	
	spacetime	90
4.1	Introduction	90
4.2	Field Equations	93
4.3	Charged Anisotropic Model 1	95
4.4	Physical Requirements...	97
4.5	Application to Compact Stars	102
4.6	Validation of Model for 4U 1820-30	104
4.7	Charged Anisotropic Model 2	111
4.8	Physical Requirements...	112
4.9	Application to Compact Stars...	116
5	Anisotropic Compacts Stars on Paraboloidal Spacetime with Linear	
	Equation of State	126
5.1	Introduction	126
5.2	The Spacetime Metric	128
5.3	Linear Equation of State	131
5.4	Matching Condition	133
5.5	Physical Acceptability Conditions	134
5.6	Discussion	137

5.7	Application of the Model to Other Stars	150
6	Models of compact stars on paraboloidal spacetime satisfying Kar-	
	markar condition	152
6.1	Introduction	152
6.2	Solution of Field Equations...	154
6.3	Solution of Field Equations	156
6.4	Boundary Conditions	157
6.5	Physical Acceptability Conditions	158
6.6	Variation of Physical Parameters	160
6.7	Physical analysis	161
6.8	Discussion	167
	Units	169
	Publications	170
	Bibliography	172
