

Dedicated to
Lord Swaminarayan
and
Guruji Param Pujya Shri Gyanjivandasji Swami
without whose kind support and blessings
I would not have been able to complete my work.

ACKNOWLEDGEMENT

At the outset, I am heartily thankful to Almighty God for blessing me with strength, dedication and patience to complete this work within the stipulated time.

As the doctoral study comes to its conclusive close, a pleasant task remains to sit back and acknowledge the sincere efforts of all those who have helped me to make this thesis see the light of the day. However, it is possible only to mention a few names here.

Working as a Teacher Educator (former) in Mathematics at The Maharaja Sayajirao University of Baroda gave me ample of opportunities to grow myself as Mathematics professional. It is through this University that I discovered and developed my abilities as a Mathematics enthusiast, teacher-trainer and as a researcher. The present research is an outcome of one of the instances of a host of learning experiences at The Maharaja Sayajirao University of Baroda and people associated with it. I acknowledge them all for their rich contributions.

I owe my sincere thanks to my guide Prof. Ruchi T. Das (former Professor, The Maharaja Sayajirao University of Baroda), Professor at University of Delhi, for her professional academic guidance. It is her erudition and scholarly advice which made it possible for me to accomplish this project. Her spirit, sincerity and accuracy have been proved a life-oriented education for my career. Without her insightful suggestions and comments, this work wouldn't have come out in this form. I would always remain thankful to her for her courteous training to become an effective mathematician.

I also express my profound and sincere thanks to Prof. Tarun K. Das (former Professor, The Maharaja Sayajirao University of Baroda), University of Delhi, (though I realize that I will never really be able to thank him properly), who introduced me to various aspects of mathematics research and influenced the way I practice. He has been the most

venerated real mentor, open access library and mobile encyclopedia. He has always been a source of inspiration for me.

I extend my sincere sense of gratitude towards Prof. Hari R. Kataria, Head, Department of Mathematics, Faculty of Science, The Maharaja Sayajirao University of Baroda for his kind support. He always welcomed me with smiling face every time I approached him for guidance.

How can I forget my teachers at Department of Mathematics, Faculty of Science, The Maharaja Sayajirao University of Baroda specially Dr. Ekta Shah and Dr. Sejal Shah who shared their research experiences with me. I am really thankful to Dr. Sejal Shah for extending her valuable support at regular intervals.

I also take this opportunity to thank the administrative staff at the Department of Mathematics, Faculty of Science and University Head office.

I sincerely thank the management and specially the Principal, Vadodara Institute of Engineering, Kotambi, for their kind help from time to time by all means. I must humbly acknowledge my indebtedness to the Head and staff members of Science & Humanity, Vadodara Institute of Engineering, Kotambi, for creating an amiable atmosphere for my research.

I can't end this without mentioning my mother for her unconditional love and moral support all along my career. I equally acknowledge the love and support bestowed upon me by my in-laws. Finally, my heartfelt thanks to my wife to ease up my domestic responsibilities and to push me forward when I lagged behind on my schedule. My daughter deserves special thanks at this juncture for adjusting her game-hours on mobiles. She has been the source of immense joy all the time.

I thank one and all who helped me directly or indirectly in carrying out my research work.

Dhaval R. Thakkar
