List of Figures	xiii
List of Symbols	xiv

1 Introduction	1
1.1 The hypergeometric function	1
1.1.1 The confluent hypergeometric series	3
1.1.2 Differential equation	4
1.1.3 Integral representation	4
1.1.4 Contiguous function relations	5
1.1.5 The Ramanujan's theorem	6
1.1.6 The Kummer's First formula	6
1.2 Sikkema's function	6
1.3 The Bessel function	6
1.3.1 The generating function relation	7
1.3.2 The Bessel's integral	7
1.3.3 Differential recurrence relation	8
1.3.4 Jacobi's expansion in series of Bessel coefficients	8
1.4 The basic hypergeometric series	9
1.4.1 Difference equation	12

1.4.2	q -Contiguous function relations	12
1.4.3	The q -binomial coefficient	13
1.4.4	The q -binomial theorem	13
1.4.5	q -Gauss summation formula	13
1.4.6	The product formula	13
1.4.7	q -Taylor's series	13
1.5	q -Analogue of Sikkema's function	14
1.6	q -Bessel function	14
1.6.1	The generating function relation	15
1.6.2	The q -Bessel's integral	15
2	The ℓ-Hypergeometric function	18
2.1	Introduction	18
2.2	Main Results	19
2.2.1	Convergence	19
2.2.2	Order of ℓ -H function ${}_1H_1^1(\ell : z)$	20
2.2.3	Integral Representation	21
2.2.4	Differential Equation	22
2.2.5	Eigen Function Property	26
2.3	The ℓ -H function ${}_2H_1^2(\ell : z)$	27
3	The q-ℓ-Ψ hypergeometric functions	29
3.1	Introduction	29
3.2	Main Results	30
3.2.1	Convergence	30
3.2.2	q -Difference Equation	31
3.2.3	Eigen function property	35
3.2.4	Contiguous function relations	37
3.3	The q - ℓ - Ψ function ${}_2\Psi_1^2(\ell : z)$	40
3.3.1	Convergence	41
3.3.2	q -Difference Equation	42
3.3.3	Eigen function property	45
3.3.4	Contiguous function relations	47
4	The generalized ℓ-Hypergeometric function	51
4.1	Introduction	51
4.2	Main Results	52
4.2.1	Convergence	52
4.2.2	Order of ${}_rH_s^p(\ell; z)$ function	53
4.2.3	Integral Representation	55
4.2.4	Differential Equation	56
4.2.5	Contiguous function relations	61
4.2.6	Eigen function property	66
4.3	Special cases	68
4.3.1	The ℓ -H exponential function	68

4.3.2	The ℓ -H trigonometric functions	71
4.3.3	The ℓ -H hyperbolic functions	73
4.3.4	Graphs	75
4.3.5	ℓ -Analogues of Ramanujan's theorem and Kummer's first formula	76
4.4	Generalized Maclaurin's Theorem	79
5	The generalized q-ℓ-Ψ hypergeometric function	81
5.1	Introduction	81
5.2	Main Results	82
5.2.1	Convergence	82
5.2.2	Order of the generalized q - ℓ - Ψ function	84
5.2.3	q -Difference Equation	86
5.2.4	Contiguous function relations	91
5.2.5	Eigen function property	95
5.3	Special cases	98
5.3.1	The q - ℓ - Ψ exponential function	98
5.3.2	The q - ℓ - Ψ trigonometric functions	102
5.3.3	The q - ℓ - Ψ hyperbolic functions	104
5.3.4	The q - ℓ - Ψ Exponential function	106
5.3.5	The q - ℓ - Ψ Trigonometric functions	109
5.3.6	The q - ℓ - Ψ Hyperbolic functions	111
5.3.7	Series transformation	113
5.3.8	q - ℓ -analogue of Maclaurin's theorem	116
6	The ℓ-H Bessel function	118
6.1	Introduction	118
6.2	Main results	122
6.2.1	Generating function relation	122
6.2.2	Differential equation	124
6.2.3	The ℓ -HBF integral	127
6.2.4	Schl��fli's Integral analogue	128
6.3	Other properties	130
6.3.1	Differential recurrence relation	130
6.3.2	ℓ -Analogue of Jacobi's expansion	136
6.3.3	ℓ -Analogue of Bessel's inequality due to Cauchy	137
6.3.4	Addition formula	139
7	The q-ℓ-Ψ Bessel function	141
7.1	Introduction	141
7.2	Main results	145
7.2.1	Generating function relation	146
7.2.2	Difference equation	147
7.2.3	The q - ℓ - Ψ BF integral	149
7.3	Other properties	151

7.3.1	Differential recurrence relation	151
7.3.2	Addition formula	158
Appendix A Computation of terminating series for the ℓ -H function		160
Appendix B The graphs of ℓ -H exponential, trigonometric and hyperbolic functions		163
Appendix C The graphs of ℓ -H Bessel functions		167
Bibliography		172
