List of Tables	xiii
Abstract.....	1
Chapter 1:	5
Introduction & Literature Review	5
1.1. History of disease Bacterial Blight	6
1.2. Economic impact of <i>Xanthomonas</i> genus	7
1.3. <i>Xanthomonas oryzae</i> pv. <i>oryzae</i>	7
1.4. Epidemiology and symptoms of disease caused by <i>X. oryzae</i> pv. <i>oryzae</i>	9
1.5. Virulence determinants of Xoo	10
1.6. Control measures against Xoo	11
1.6.1. Conventional chemicals to control disease caused by Xoo	11
1.6.2. Biological control.....	12
1.6.3. Resistance genes in the host.....	13
1.6.4. Limitations of the BB control methods.....	14
1.7. Alternative strategies to control BB disease	14
1.8. Antibiotics against Xoo.....	15
1.9. Small molecule compounds and their application	16
1.9.1. Small molecule compounds as virulence attenuators.....	18
1.9.2. Small molecule compounds that increase efficacy of antibiotics	20
1.10. Efflux pumps and Efflux pump inhibitors	20
1.10.1. Efflux pumps (EPs).....	20
1.10.2. Efflux pump inhibitors (EPIs).....	23
Chapter 2:	28
Isolation, screening and characterization of bacterial antagonists against	
<i>Xanthomonas oryzae</i> pv. <i>oryzae</i> BXO43.....	28
2.1. Introduction	29
2.2. Materials & Methods	30
2.2.1. Bacterial pathogen and rice plant cultivar used	30
2.2.2. Media used for isolation and characterization of microorganisms	30
2.2.3. Isolation of bacterial antagonists.....	31

2.2.4. Culture maintenance and storage	32
2.2.5. <i>In vitro</i> screening of antagonists of Xoo BXO43.....	32
2.2.6. Physiological and Biochemical characterization of isolates	32
2.2.7. 16S rRNA gene sequencing and sequence analysis.....	32
2.2.8. <i>gyrB</i> sequencing and ARDRA	33
2.2.9. Inoculation of rice plant with antagonistic bacteria	34
2.2.10. Detached leaf assay	35
2.2.11. Efficacy of cell free culture supernatant of isolate S2 on preventing disease symptoms on rice leaves	35
2.2.12. Antimicrobial activity of <i>B. altitudinis</i> S2	36
2.2.13. Statistical analysis	36
2.3. Results.....	37
2.3.1. Isolation of bacterial antagonist to Xoo	37
2.3.2. <i>In vitro</i> screening of antagonists of Xoo BXO43.....	38
2.3.3. Characterization and identification of bacterial isolates antagonistic to Xoo BXO43	40
2.3.4. Effect of isolates on growth of rice plant	40
2.3.5. Evaluation of inhibitory activities of the selected antagonistic bacteria on lesion development by detached leaf assay.....	44
2.3.6. Colonization studies of the selected antagonistic isolates using rice plant. 45	
2.3.7. Influence of cell free supernatant of <i>B. altitudinis</i> S2 on the disease symptoms of Xoo	47
2.3.8. Confirmation of identification of <i>B. altitudinis</i> S2	48
2.3.9. Antimicrobial activity of <i>B. altitudinis</i> S2 on few bacterial and fungal strains	49
2.4. Discussion	50
Chapter 3:	54
Production, extraction and characterization of bioactive metabolite (antibiotic S2) produced by <i>Bacillus altitudinis</i> S2.....	54
3.1. Introduction.....	55
3.2. Materials & Methods	56
3.2.1. Chemicals.....	56
3.2.2. Media	57
3.2.3. Screening of media for antibiotic production.....	57
3.2.4. Stability test of the crude antibiotic S2 in CFS of <i>B. altitudinis</i> S2.....	58
3.2.5. Effect of different carbon sources and other physical parameters on production of antibiotic S2 production	58

3.2.6. Time-course production of antibiotic S2 from <i>B. altitudinis</i> S2.....	59
3.2.7. Extraction of antibiotic S2 from CFS	59
3.2.8. Thin Layer Chromatography.....	60
3.2.9. Direct Bioautography using Thin Layer chromatography (TLC)	60
3.2.10. Determination of Minimum Inhibitory Concentration (MIC) and Minimum Bactericidal Concentration (MBC) of partially purified antibiotic S2 produced by <i>B. altitudinis</i> S2.....	61
3.2.11. Time-kill assay of partially purified antibiotic S2	62
3.2.12. Semi-preparative HPLC	62
3.2.13. HRLC-MS/MS analysis	62
3.2.14. Scanning Electron Microscopy (SEM)	63
3.2.15. Live-dead staining of antibiotic treated Xoo BXO43 and <i>S. aureus</i>	63
3.2.16. Determination of protein concentration	64
3.2.17. SDS-PAGE analysis.....	64
3.2.18. Kresek Model of rice plant to study the effect of solvent extracted antibiotic S2 on prevention of BB.....	64
3.2.19. Design of primers for genes for type III polyketide from <i>B. altitudinis</i> database using bioinformatics and their validation.....	65
3.3. RESULTS	66
3.3.1. Screening of production media and extraction solvents for antibiotic S2 from <i>B. altitudinis</i> S2	66
3.3.2. Effect of different carbon sources, temperature and pH on antibiotic S2 production by <i>B. altitudinis</i> S2.....	67
3.3.3. Time-course production of antibiotic S2 and growth of <i>B. altitudinis</i> S2 ..	69
3.3.4. Determination of efficacy of solvent extracted antibiotic S2 in controlling the Kresek disease	69
3.3.5. Effect of different physicochemical parameters on solvent extracted antibiotic S2 activity	71
3.3.6. Separation and detection of bioactive component from solvent extracted antibiotic S2	71
3.3.7. Purification and characterization of the antibiotic S2	73
3.3.8. Detection of type III polyketide genes from <i>B. altitudinis</i> S2	74
3.3.8. Determination of MIC and MBC of partially purified antibiotic produced by <i>B. altitudinis</i> S2 against Xoo BXO43	75
3.3.9. Effect of partially purified antibiotic S2 on morphology of Xoo BXO43 and <i>S. aureus</i>	77
3.3.10. Effect on total protein of Xoo BXO43 when treated with antibiotic S2...	78
3.4. Discussion	79

Chapter 4:	86
Studies on virulence attenuation of <i>Xanthomonas oryzae</i> pv. <i>oryzae</i> by small molecule compounds	86
4.1. Introduction	87
4.2. Materials & Methods	89
4.2.1. Bacterial strains, plasmids and growth conditions	89
4.2.2. List of compounds	89
4.2.3. Effect of compounds on growth of Xoo for determination of sub inhibitory concentration	89
4.2.4. Construction of reporter strain	90
4.2.6. Cellulase & Pectinase assay	92
4.2.7. EPS isolation and estimation	93
4.2.8. Motility Agar assay	93
4.2.9. Detached leaf assay	93
4.2.10. Statistical analysis	93
4.3. Results	94
4.3.1. Determination of sub-inhibitory concentration of the small molecule compounds	94
4.3.2. Growth response of Xoo BXO43 to sub-inhibitory concentration of the selected compounds	94
4.3.3. Effect of the selected compounds on T3SS of Xoo BXO43	96
4.3.4. Influence of the selected compounds on exoenzyme production by Xoo BXO43	98
4.3.5. Influence of the selected compounds on Extracellular Polysaccharide (EPS) production and swimming motility by Xoo BXO43	100
4.3.6. Influence of selected compounds on lesion formation by detached leaf assay	102
4.4. Discussion	103
Chapter 5:	106
Studies on effect of combination of antibiotic S2 and small molecule compounds on <i>Xanthomonas oryzae</i> pv. <i>oryzae</i>	106
5.1. Introduction	107
5.2. Materials & Methods	111
5.2.1. MIC of antibiotics	111
5.2.2. Checkerboard microdilution assay	111
5.2.3. EtBr efflux assay	112
5.2.4. Design of primers for efflux pump genes from Xoo database using bioinformatics and validation	113

5.2.5. RNA extraction, cDNA synthesis and comparative qRT-PCR.....	114
5.3. Results.....	115
5.3.1. Minimum Inhibitory concentrations and modulating activities of small molecule compounds.....	115
5.3.2. Effect of Caffeic acid on MIC of other antibiotics	116
5.3.3. Evaluation of inhibition in EtBr efflux by small molecule compounds....	116
5.3.4. Effect of caffeic acid on expression of efflux pump genes of XooBXO43	118
5.4. Discussion	119
Summary.....	123
Conclusion.....	131
Bibliography	136
Presentations & Publication.....	161
