

## List of Tables

Table 2.1: Primers used for the molecular characterization of the antagonistic isolates.....	34
Table 2.2: Source of screened isolates and their inhibitory characteristics against Xoo BXO43 .....	38
Table 2.3: Cz/Cs ratio of selected isolates against the pathogen Xoo BXO43 and the plant and tissue source from which the bacteria were isolated. ....	39
Table 2.4: Morphological and biochemical characterization of selected six antagonistic bacterial isolates.....	41
Table 2.5: Isolates identified by 16S rRNA sequencing and their accession number in NCBI.....	42
Table 2.6: Quantitation of effect of isolates on rice plant in terms of root, shoot length and dry weight of root and shoot of rice plant. ....	43
Table 2.7: Antimicrobial spectrum of <i>B. altitudinis</i> S2 .....	50
Table 3.1: Primers designed for genes from polyketide synthesis pathway .....	66
Table 3.2: Screening of media and organic solvents for production and extraction of antibiotic S2 produced by <i>B. altitudinis</i> S2 .....	67
Table 3.3: Plant parameters to evaluate efficacy of antibiotic S2 in protecting rice plant.....	70
Table 3. 4: Stability of antibiotic S2 in different treatments.....	71
Table 4.1: Strains, plasmids and oligonucleotides used in construction of transcription-reporter assay system in Xoo BXO43 .....	91
Table 4.2: Effect of compounds at sub-inhibitory concentration on promoter activity in Xoo BXO43XOPQ harbouring reporter plasmid and grown in XOM2 medium .....	98
Table 4.3: Quantification of swimming motility in terms of diameter covered by Xoo BXO43 in the presence of chemicals. ....	101
Table 5.1: Antibiotics groups based on their mode of action and chemical nature .....	109
Table 5.2: Primers designed for different efflux pump genes for qRT-PCR.....	113
Table. 5.3: Effect of small molecule compounds on the MIC of antibiotic S2 Without against Xoo BXO43 .....	115
Table 5.4: Effect of caffeic acid on MIC of other antibiotics against Xoo BXO43 .....	116
