

TABLE OF CONTENTS

Acknowledgments.....	i
LIST OF TABLES	iv
LIST OF FIGURES	v
LIST OF ABBREVIATIONS.....	vii
Chapter 1	1
1.1 Introduction	1
1.2 History of probiotics:	2
1.3 Selection of Probiotics	5
1.4 Probiotic Microorganisms	7
1.4.1 The genus <i>Lactobacillus</i>	8
1.5 Sources, isolation and identification of lactobacilli	9
1.5.1 Sources.....	9
1.5.2 Isolation.....	11
1.5.3 Identification	12
1.6 Characterization of lactobacilli as probiotics	14
1.6.1 Resistance to acidic environment.....	14
1.6.2 Resistance to bile salts	16
1.6.3 Antimicrobial activity	18
1.6.4 Antibiotic susceptibility	20
1.7 Adhesion of lactobacilli strains	21
1.7.1 Adhesion models.....	22
1.7.2 Adhesion mechanism of lactobacilli	25
1.7.3 Factors influencing adhesion	29
1.8 Intestinal epithelial barrier	31
1.8.1 Composition of tight junction proteins	33
1.8.2 Signalling pathways involved in regulation of tight junction.....	38
1.8.3 Cytokines mediated TJ regulation	40
1.8.4 Effect of altered intestinal integrity	41
1.8.5 Modulation of intestinal barrier function by lactobacilli	43
1.8.6 Methods used to study intestinal integrity <i>in vitro</i>	44
1.9 Ulcerative colitis	46
1.9.1 Intestinal epithelial barrier function in UC	48
1.9.2 Treatments of colitis	49
1.9.3 Lactobacilli in the management of colitis.....	50

1.9.4	Animal models used to study colitis	51
Chapter 2		55
2.1	Introduction	55
2.2	Materials and Methods	57
2.2.1	Standard <i>Lactobacillus</i> strain.....	57
2.2.2	Isolation and identification of lactobacilli	57
2.2.3	Bile and Acid tolerance.....	59
2.2.4	Antimicrobial activity	60
2.2.4	Antibiotic susceptibility assay	60
2.2.5	Statistics	61
2.3	Results	61
2.3.1	Isolation and identification of lactobacilli	61
2.3.2	Bile tolerance	64
2.3.3	Acid tolerance	65
2.3.4	Antimicrobial activity	66
2.3.5	Antibiotic susceptibility	68
2.4	Discussion	70
Chapter 3		74
3.1	Introduction	74
3.2	Materials and Methods	75
3.2.1	Epithelial cell culture	75
3.2.2	Adhesion assays	76
3.2.3	Competitive adhesion assays to HT-29 and Caco-2 monolayers.....	76
3.2.4	Statistics	77
3.3	Results	78
3.3.1	Adhesion of lactobacilli to intestinal epithelial cell-lines.....	78
3.3.2	Competitive adhesion assays	79
3.4	Discussion	81
Chapter 4		84
4.1	Introduction	84
4.2	Materials and Methods	86
4.2.1	Bacterial strains.....	86
4.2.2	Intestinal epithelial cell-culture.....	87
4.2.3	TEER and permeability assay	88
4.2.4	Expression analysis of mRNA encoding TJ proteins	89

4.2.5	Immunofluorescence assay	93
4.2.6	Statistical analysis	94
4.3	Results	95
4.3.1	Effect of lactobacilli on TEER of the EPEC O26:H11-infected monolayers.....	95
4.3.2	Effect of lactobacilli on the paracellular permeability across the EPEC O26:H11-infected monolayers	97
4.3.3	Levels of mRNA expression specific for TJ protein in EPEC-infected HT-29 cells	99
4.3.4	Distribution of TJ proteins in Caco-2 cells	101
4.4	Discussion	107
Chapter 5		112
5.1	Introduction	112
5.2	Materials and methods	114
5.2.1	Lactobacilli strains	114
5.2.2	Experimental Animals	115
5.2.3	Induction of colitis in mice	115
5.2.4	Assessment of body weight and colon length.....	116
5.2.5	Histological analysis	117
5.2.6	Expression analysis of mRNA encoding TJ proteins	118
5.2.7	Statistics	120
5.3	Results	120
5.3.1	Body weight	120
5.3.2	Colon length.....	121
5.3.3	Levels of mRNA expression specific for TJ proteins.....	122
5.3.4	Histological analysis	125
5.4	Discussion	127
BIBLIOGRAPHY		131
ABSTRACT CUM SUMMARY OF THE THESIS		175
LIST OF PUBLICATIONS		181
