

Acknowledgments

The journey of Ph.D. is like climbing a mountain and is required the contribution of many people to reach the top. I would like to take this opportunity to thank those people who supported me in my journey toward to becoming a research scientist. This journey is truly life changing which make us learn real science and hard work. Each year of the Ph.D. gived me new learning experience which made me more enthusiastic toward research.

*I would like to express my deep appreciation and thanks to my supervisor **Prof. G Archana**. I think the backbone of my Ph.D. is the selfless help provided by her. It has been the honored to be her Ph.D. student. I would like to thank her for encouragement in my research which kept me enthusiastic towards the research. I have got the pleasure to enjoy her scientific concepts, ideas and attitude to learning more and try new things. I appreciate her contribution for time and funding to making my Ph.D. successful. She always inspired me to focus on the work without getting distracted by the minor issues happened around. I always admire her as successful women professor and she is an excellent example for many of us. After the Archana mam, the second person I would like thank **Prof. G. Naresh Kumar** who contributed in our research by giving us excellent ideas for experiments. He is the one who teaches me the scientific attitude by telling me to understand the true meaning of the experiments while doing it which help us to keep the harmony with the real word of science. The scientific discussion with him develops the attitude to investing the time towards the high goal. He is the fully passionate person who thinks out of the box and gives the world-class ideas which inspire us to become more excited toward the science.*

*I thankfully acknowledge **Prof. Sarita Gupta** (Head of the Biochemistry and Coordinator of DBT-MSUB-ILSPARE project) for providing the excellent sophisticated instruments facility at Dr. Vikaram Sarabhai building, MSU, Faculty of Science. I would like to thank her also for giving me the opportunity to work on this project.*

I would like to thank scientific community for providing the articles and Prof. Anton Hartmann (Helmholtz Center Munich, Germany) for providing GFP plasmid to me.

I would like to express my gratitude to Head of the Department Prof. G. Archana and former HoDs for providing the infrastructure and excellent research facility. She is always helping students by further strengthening the instrument facility in the department.

I sincerely thank Prof. A. S. Nerurkar and Dr. J Manjrekar for giving the valuable suggestions during the scientific sessions of Ph.D. students. I extend my thanks to all the member of the department Prof. Pranav Vyas for teaching that always maintain the pace and patience during the journey to becoming Ph.D., Prof. S. Ingle and Dr. Nandita Baxi for their support.

I would like to thank my senior Dr. Radhika, Dr. Jagat, Dr. Kuldeep, Dr. Priyadarshan, Dr. Rakesh (PDF fellow) and Dr. Anoop for their support whenever required without any

hesitation. I would also like to thank the Dr. Ruchi, Dr. Murlí, Dr. Subbu, Ms. Sanjukata and Dr. Priya for their help. I also thank Abhi, Gosai, Vihang, Shweta, Mihir, Mansi, Siddhi, Juliya, Jigar, Dipeksha, Prachi, Anand and Swati. I always remember the discussions over coffee and always helped me whenever I needed you **Abhi**. I also like to wish all the new Ph.Ds a successful tenure.

I would like to special thanks, **Shirish sir**, for his helping nature and efficiently taking care of all the official work every time during my Ph.D. His timely help from start of my Ph.D. is greatly acknowledged. I also thank him for helped me in travel grant paper work and process. I can't thank enough for all that help you have done for me.

I also like to thank the Aparna madam for providing the bacterial strains whenever it is required. I also thank Praveen Sir, Madvekar sir, Talati sir and Seema Madam for their timely help and assistance. Also, thank Thomas Ma'am duly acknowledge for her help whenever required, South Indian food and Cakes. Thank the Pradeep bhai, Nilesb bhai, and Jayesh bhai for their help and assistance.

I would like to thank all the GFL dissertation students for creating the scientific and enjoyable environment in the Lab.

The financial assistance and fellowship received from Department of Biotechnology (DBT) under the project DBT-MSUB-ILSPARE, Ministry of Science and Technology, New Delhi, India.

I am immensely indebted to my **Ma** and **Papa** whose blessing, concerted effort, constant motivation, encouragement and true-hearted cooperation enable me to reach this milestone. I cannot finish without thanking my lovely sister **Binal**, for her support and timely help in my experiments whenever I stuck and lose the hope of getting the results. She always stands by my side in solving the problems which helped me a lot in improving my fundamentals. It is always great to discuss the science with you and always fun to irritate you by asking a number of questions. No word can thank you enough for always staying with me and supporting me.

I thank the God almighty for kind blessing all the time.

Janki K. Patel
