

ACKNOWLEDGEMENT

For me, Ph.D. tenure was like the course of a wandering river, which meanders through valleys and hills, which sings and dances along the countryside echoes, which gobbles the trees like hungry and vexed monster. There were many faces that had been with me during the happy days, which had meandered around the struggles I underwent and rendered helping hands and moral support to pacify the vexed monster and finally reaching the destination like a river slowly winding down hill, twisting and turning. As per my understanding, acknowledgement is the expression of your regards to the persons and their thoughts which has helped you to achieve the particular goal. Influence can be of positive support kind and critics types as well. When it comes to acknowledge the people associated with me, directly and indirectly to my Ph.D. tenure @ M. S. University, I have long list of well wishers and supportive people whom I would like to acknowledge for their importance in my research journey.

First, I would like to express my thanks to my research guide, Dr. G. Archana for her highest belief in my research aptitude and her continuous involvement in the finding out the space in my research aptitude where she can improve me and convert into type of researcher, who believed more in curiosity and action plan accordingly rather than only getting the degree and publicity. As per my perception curiosity based research is a very important and key element for the fundamental research growth of an institution. As my career is concerned, I left the active job from a biosimilar manufacturer Intas *Biopharmaceutical Ltd* and decided to join the PhD programme, so again I would like to express my great thanks to Dr. Archana for considering me.

I take this opportunity to thank Prof. G. Naresh Kumar, approachable, humble and very down to earth person, whose critical comments and advice especially during lab meetings helped me to see the other facets of the work, which otherwise wouldn't have thought of.

My special thanks to Prof. T. Bagchi, current Head of the Department and Prof. A. J. Desai (Retd), former Head of Department of Microbiology and Biotechnology Centre, for providing excellent academic support, research facilities and human resources support.

I would like to thank all of my dissertation, summer training, project students. Starting with Ms. Jyotika for helping me during start up of my Ph.D. work, Ms. Malini Kotak for being with me and helping during the collection and screening of fluorescent pseudomonads from different parts of Gujarat, Mr. Devdutt Dandekar for being with me during the study on the P-solubilization mechanism, Ms. Sweta Talreja during my studies on antifungal metabolite biosynthesis and regulation, Ms. Shruti Shah during my studies on the interaction of rhizobia and fluorescent pseudomonads, Ms. Ishani Das for being with me during exploration of antifungal metabolite biosynthesis gene in fluorescent pseudomonad isolates, Ms. Shruti Gala during understanding of ACC/KMBA biosynthesis pathway in fluorescent pseudomonad isolates, Ms. Mansha Munshi during exploration of phenazine derivatives biosynthesis in fluorescent pseudomonad strains and effect of nutritional factors on the biosynthesis of phenazines. I am thankful to all of you for your great input/suggestions during exploration of different aspect of studies on the biocontrol traits in fluorescent pseudomonads.

All words are less to express special thanks to my senior cum friend Dr. Sanjay Jha, for his huge support during joining the Ph.D. course and further support for the continuation of study as a local guardian, so I will be very thankful to him throughout my life. Seniors list is large but one by one, thanks to Dr. Manish Shukla, Dr. Arif Khan, Dr. Vikas Sharma, Dr. Aditi Buch, Dr. Divya Patel, Dr. Shajil, Dr. Kuldeep Patel, Dr. Archana Gupta, Dr. Rajesh Patkar, Dr. Bishun Prasad, Dr. Devesh Suthar for their positive attitude to provide me as much help as possible and guidance from their side.

Further, I will move to express my thanks to my dear pals during this tenure. Starting with Dr. Srinandan for daily big dinner session with full discussion on all new researches, new experimental findings and strategy for next experiment, Mr. Chanchal kumar, PhD student biochemistry department who has been my friend since my graduation days and always shared the up-down of life and PhD research work, Dr. Ketan for research discussions and great critic sessions daily for each research scholars and friends, Mr. Priyadarshan for discussion of our personal life with each other as he is friend of mine since 10 years, Mr. Murali Sharaff for being so genuine, much religious person with huge patience capacity to face any challenges in life. My special thank to Mr. Subrahmanyam G. also known as Subbu for his friendship, politeness to our friendly values, and great energy and excitement attitude for research work. I would like to thank all the research scholars of GFL (Sanjukta also called fuzuka for great respect for us, Radhika for nice company to work in GFL, RL-I research scholars (Dr. Anil, Dr. Aparna, Jagat, Priya) and RLII research scholars for their help and cooperation.

I am grateful to Shirish bhai who helped me in all official as well as personal aspects whenever required. He helped me immensely in all university related official works.

I also thank Khatri bhai and Talati bhai for their help. I thank Aparna Madam, Mandvekar bhai, Thomas Madam, Praveen bhai for providing support and Seema Mam for providing distilled water during its shortage. I am grateful to Nairbhai, Varghese bhai and Nitesh bhai who willingly extended their help every time I required. I am thankful to Babukaka and Chiman Bhai for their help as when ever required. I also thank Nilesh bhai, Dileep bhai, Pradeep bhai and Jayesh bhai for their help.

My wonderful family supported immensely throughout my journey. I would like to thank my wife Dr. Bhairavi for her great help in proof reading and editing and further great emotional support during the more critical tenure of 2009-2012. At the same time my son Raghav, who understood my writing and reading jobs (Ph.D. thesis) and controlled his patience during same; at his level it was great support. Further great support from father- Sri Ram Awadh Chaubey (who has never been exposed to a true scientist and seen the Ph.D. as a literature Ph.D.), emotional support from mother-Smt. Lilawati Chaubey (for her great support even after not knowing what PhD is?), my elder brothers- Shri G.N. Chaubey & Shri K.N. Chaubey (for all financial support, guidance as best responsible guardians), younger brother-Balwant (for conversation and suggestions on the academic and family part), my sisters-Mrs. Manju Pandey (for understanding the achievements of Ph.D. and needful appreciation), Mrs. Maya Pandey and Babalu Jija for encouragement, Mrs. Mamata Tiwari for great appreciation and encouragement for Ph.D. I would also like to thank my

mother in law, Smt. Kalindi Pandey, for great care and daily encouragement to Bhairavi to support me.

I am thankful to Gujarat State Biotech Mission, GSBTM and UGC-RFMS for their great financial support from to carry out this research work.
