

CONTENTS

Chapter 1. Introduction

1.1 Materials under Nano regime.....	1
1.1.1 Nanomaterials	1
1.1.2 One-Dimesional Nanomaterials	2
1.2 Strategies to Improve Properties of Nanowires	6
1.2.1 Tuning Diameter.....	6
1.2.2 External Strain	7
1.2.3 Doping/Creation of Defects	8
1.2.4 Constructing Heterostructure	8
1.3 Research Objectives.....	11
1.4 Structure of the Thesis	12
References.....	20

Chapter 2. Theoretical Approach and Computational Methodology

2.1 Introduction to Density Functional Theory	25
2.2 The Schrödinger Equation and Many-Body Problem	26
2.3 A Journey from Wave-Function to Density	28
2.3.1 The Born-Oppenheimer Approximation	28
2.3.2 Independent Electron Approximation	30
2.3.2.1 Hartree Approximation	30
2.3.2.2 Hartree-Fock Approximation	30
2.4 Thomas-Fermi Theory	32
2.5 Hohenberg and Kohn Theorem	33
2.6 The Kohn-Sham Equation	36
2.7 Exchange and Correlation Functionals	39

2.7.1 Local Density Approximation	39
2.7.2 Generalized Gradient Approximation	40
2.8 Density Functional Perturbation Theory	41
2.9 Dispersion Correction to Density Functional Theory	43
2.10 Optical Properties under Random Phase Approximation	45
2.11 Thermoelectric Properties under Boltzmann Transport Equations	48
References.....	52

Chapter 3. *Ab Initio* Energetics of Gallium Pnictides

3.1 Introduction	58
3.2 Computational Details	60
3.2.1 Bulk crystal structures	60
3.2.2 One-Dimensional Nanostructures: The Nanowires	62
3.3 Results and Discussion	64
3.3.1 Ground State Properties of GaX Compounds in Bulk Polytypes	64
3.3.1.1 Structural Properties	64
3.3.1.2 Electronic Properties	66
3.3.1.3 Vibrational Properties	69
3.3.1.4 Thermal and Thermoelectric Properties	74
3.3.2 Ground State Properties of GaX NWs	84
3.3.2.1 Structural Properties	85
3.3.2.2 Diameter and Strain Dependent Electronic Properties	90
3.3.2.3 Diameter and Strain Dependent Optical Properties.....	97
3.4 Conclusion	104
References.....	107

Chapter 4. Electro-optic Properties of Gallium Pnictide Heterostructure Nanowires

4.1 Introduction	113
4.2 Computational Details	117
4.3 Results and Discussion	120
4.3.1 Structural Properties	120
4.3.2 Electronic Properties	124
4.3.3 Optical Properties	130
4.3.4 Application to the Photovoltaic Solar Cells.....	132
4.4 Conclusion	135
References.....	136

Chapter 5. Electro-Optic Properties of Aluminium Pnictides under Bulk and Confined Regimes

5.1 Introduction	142
5.2 Computational Details	144
5.3 Results and Discussion	146
5.3.1 From bulk to Nanowire	146
5.3.1.1 Structural Properties	146
5.3.1.2 Electronic Properties	148
5.3.1.3 Dynamical Properties	150
5.3.1.4 Optical Properties	151
5.3.2 Heterostructure Nanowire	154
5.3.2.1 Structural Properties	154
5.3.2.2 Electronic Properties	156
5.3.2.3 Optical Properties	159
5.4 Conclusion	160

References.....	162
-----------------	-----

Chapter 6. Phosphide Nanowires for Photocatalytic Application

6.1 Introduction	166
6.2 Computational Details	167
6.3 Results and discussion	169
6.3.1 Boron Phosphide Nanowire (BP NW)	169
6.3.1.1 Structural Properties	169
6.3.1.2 Electronic Properties	171
6.3.1.3 Catalytic activity of BP NW.....	174
6.3.1.3.1 Hydrogen Evolution Reaction (HER) Activity	174
6.3.1.3.2 Oxygen Evolution Reaction (OER) Activity.....	180
6.3.2 Gallium Phosphide Nanowire (GaP NW)	184
6.3.2.1 Structural Properties	184
6.3.2.2 Electronic Properties	186
6.3.2.3 Catalytic activity of GaP NW	189
6.3.2.3.1 Hydrogen Evolution Reaction (HER) Activity.....	189
6.3.2.3.2 Oxygen Evolution Reaction (OER) Activity.....	194
6.4 Conclusion	195
References.....	196

Chapter 7. Summary and Future Scope.....200
