

Acknowledgement

During the period I was at MSU, a number of people were extremely important in helping me with this work. The list of those in whose debt I am is long, much longer than the few names that will appear here.

First and the most I would like to express my deep sense of gratitude to my research guide Prof. A. C. Sharma, Head, Physics department, whose suggestions and criticism have been indispensable in the successful completion of this work.

I acknowledge the support and facilities provided by DST, New Delhi, INFLIBNET, PWSCF-forum, teaching and non teaching staff of the Physics Department.

I owe special thanks to Bhalchandra Pujari and Prof. D. G. Kanhere of Pune University for introducing Quantum Espresso and shell scripting to me.

I place on record my heartfelt thanks to my friends Sanjeev Gupta, Nilesh Gaekwad, Jignesh Bhatia and Dharmendra Tawde who were always there in difficult time to encourage me.

PhD course introduced me to Sikandarbaiya, Pratik, Digish, Aditya and Tripathiji. Who turned out to be more than a colleague, I consider them good friends. Tea breaks are a part of the PhD program and the people who were always ready to have a cup of tea and chat away the afternoon will be missed once I've left the MSU.

I consider it too formal to thank my parents, sister and my friends at Ahmedabad whose regular contact I lost due to my PhD course at Baroda. Specially Ajaybhai, Jaymin, Amit, Amit Parekh, Kamlesh, Gemar, Kanubhai are few of them whom I would always like to be with.

Sagar K. Ambavale
