Preface	i
Acknowledgements	iii
List of Figures	xvi
List of Tables	xx
1 Introduction	1
1.1 Types of reactions	2
1.2 Reaction cross section	5
1.3 Weakly bound, Exotic nuclei, Halo nuclei and Borromean systems .	7
1.4 Studies involving weakly bound nuclei	8
1.4.1 Elastic scattering	8
1.4.2 Fusion excitation function	10
1.4.3 Fusion barrier distribution	14
1.4.4 Quarter point angle	16
1.5 Motivation of the study	17
1.6 Objectives of the study	19
1.7 Plan of the Thesis	20

2	Theoretical Models	22
2.1	Optical Model	22
2.2	Optical potential	23
2.2.1	Dispersion Relation calculation	24
2.3	One Dimensional Barrier Penetration Model	26
2.4	Decay of Compound Nucleus: Statistical model	27
2.5	Fusion cross section calculations	29
2.6	Coupled Channels calculations	30
2.6.1	Coupled Reaction Channels(CRC) formalism	31
2.6.2	Continuum Discretized Coupled Channel(CDCC) formalism	33
2.7	Extraction of fusion barrier distributions	35
2.7.1	Barrier distribution from quasi-elastic excitation function	35
2.7.2	Barrier distribution from fusion excitation function	37
3	Elastic scattering and Fusion cross sections measurement for ${}^7\text{Li}$ + ${}^{27}\text{Al}$ system	39
3.1	Introduction	39
3.1.1	Present measurement	40
3.1.2	Accelerator Facility	40
3.2	Experimental setup and Electronics	41
3.2.1	Identification of charged particles	43
3.3	Experimental Details	44
3.4	Data Analysis	47
3.4.1	Optical Model analysis of elastic scattering angular distribution	47
3.4.2	Dispersion relation analysis	50
3.4.3	Analysis and discussion of measured α spectra	51

3.4.4	Statistical model analysis	52
3.4.5	Coupled-Channels Calculations using CDCC and CRC for- malism	55
3.5	Results and Discussion	62
4	Elastic scattering measurement for ${}^7\text{Li} + {}^{159}\text{Tb}$ system	63
4.1	Introduction	63
4.1.1	Present work	64
4.1.2	Accelerator Facility	64
4.2	Experimental Details	67
4.3	Data Analysis	68
4.3.1	Optical Model analysis of elastic scattering angular distri- bution	68
4.3.2	Dispersion relation analysis	72
4.3.3	Total Reaction cross sections	72
4.4	Continuum Discretized Coupled-Channels (CDCC) Calculations . .	73
4.5	Results and Discussion	77
5	Fusion barrier distributions for ${}^{6,7}\text{Li} + {}^{209}\text{Bi}$ systems	78
5.1	Introduction	78
5.1.1	Present work	79
5.2	Experimental Details	80
5.3	Data Analysis	82
5.3.1	Quasi elastic scattering excitation functions	82
5.3.2	Derivation of fusion barrier distributions	86
5.3.3	Transmission probability (T_o)	86
5.4	Theoretical Analysis	88

5.4.1	Simple Coupled Channels calculation	89
5.4.2	Continuum Discretized Coupled-Channels (CDCC) Calculations	91
5.4.3	Coupled Reaction Channels (CRC) Calculations	93
5.5	Results and Discussion	97
6	Summary and Conclusions	99
