

List of Table

No.	Caption of the table	Page No.
4.1	Irradiation and sample details for FOTIA experiments	57
4.2	Irradiation and sample details for TIFR experiments	57
4.3	Nuclear spectroscopic data of the radio-nuclides from the $^{197}\text{Au}(n,\gamma)^{198\text{g}}\text{Au}$ and $^{115}\text{In}(n,\gamma)^{116\text{m}}\text{In}$ reactions used in the calculation	62
4.4	$^{197}\text{Au}(n,\gamma)^{198\text{g}}\text{Au}$ and $^{115}\text{In}(n,\gamma)^{116\text{m}}\text{In}$ reaction cross sections at different neutron energies and neutron flux	68
5.1	Nuclear spectroscopic data of the products from the $^{115}\text{In}(n,\gamma)^{116\text{m}}\text{In}$ and $^{55}\text{Mn}(n,\gamma)^{56}\text{Mn}$ reactions used in the calculation	77
5.2	$^{115}\text{In}(n,\gamma)^{116\text{m}}\text{In}$ and $^{55}\text{Mn}(n,\gamma)^{56}\text{Mn}$ reaction cross sections at different neutron energies along with the neutron flux	82
6.1	Details of the thorium and uranium irradiations	96
6.2	Selected reactions, half-life of product, Q value and threshold of reaction	97
6.3	Fission and reaction nuclides, with their half-lives, decay modes and related prominent γ -ray energies with branching intensities (NuDat)	100
6.4	Covariance matrix for efficiencies used in the measurement	102
6.5	Covariance matrix for the measured cross-sections	103
6.6	Correlation matrix for the measured cross-sections	104
6.7	Reaction cross-sections at different neutron energies for $^{232}\text{Th}(n,\gamma)$ reaction	105
6.8	Reaction cross-sections at different neutron energies for $^{238}\text{U}(n,\gamma)$ reaction	106
