Chapter 1-Introduction to the world of hyperspectral remote sensing-Literature

review	28
Summary.....	29
1.1 Introduction to hyperspectral remote sensing.....	29
1.1.1 Remote sensing fundamentals	29-32
1.1.1.1 Types of remote sensors	32-33
1.1.1.2 Characteristics of a remote sensor	33-35
1.1.1.3 Imaging system	35-36
1.1.1.4 Platforms	36-37
1.1.2 Hyperspectral remote sensing	37
1.1.2.1 Need for hyperspectral remote sensing	37-38
1.1.2.2 Hyperspectral remote sensing -Introduction	38-40
1.1.2.3 Concept of signatures	41-45
1.1.3 Hyperspectral sensors	45-49
1.2 Issues with hyperspectral data	49
1.2.1 Inherent issues	49-59
1.2.2 Data redundancy	60-61
1.2.3 Image classification	61-62
1.2.4 Atmospheric correction	62-66

1.3 Study objectives	66
1.4 Outline of Thesis	67-68
References	69-93
 Chapter 2-Issues arising from experimental and human errors	94
Summary	95
Background	95-96
2.1 Data and software used	96-97
2.1.1 Hyperion	97
2.1.2 Hyperspectral Imager for Coastal Oceans	97-98
2.1.3 Airborne Imaging Spectrometer	98
2.1.4 Hyperspectral Imager- Spaceborne and Airborne	99-100
2.1.5 Hand-held spectroradiometer	100
2.1.6 Image processing software	100
2.1.7 Data simulation software	101
2.1.8 Statistical software	101
2.1.9 Spectra analysis software	101-102
2.2 Study areas	102
2.2.1 Bhitarkanika reserved forest	102-103
2.2.2 Jamnagar mangrove forest	103-104
2.2.3 Forest Research Institute, Dehradun, Uttarakhand	104
2.2.4 Laboratory spectra	105
2.2.5 Research farm at Anand Agricultural University	105-106
2.2.6 Jalandhar, Punjab, India	106-107
2.2.7 Agricultural fields of Moga and Naraingarh areas of Punjab	107-108
2.2.8 Anonymous sites	108
2.3 Quality check for inherent issues with hyperspectral data for vegetation assessment	109
2.3.1 Understanding the influence of smile effect	110-120

2.3.2 Understanding the issues in vegetation spectra	120-128
2.3.3 Band-to-band registration	128-133
2.3.4 Noise	134-136
2.3.5 Image Distortion	136-137
2.4 Sources of experimental errors that affect data quality	137
2.4.1 Effect of change in exposure time	137-139
2.4.2 Effect of inappropriate sampling	140-141
2.4.3 Effect of leaf stacking	142-143
2.4.4 Effect of phenology	143-145
2.4.5 Effect of variety	146
2.4.6 Effect of sensor saturation radiance	147-148
2.4.7 Species considerations	148-149
2.4.8 Others	150-151
References	152-154

Chapter 3-Issues of atmospheric correction, data redundancy and image classification 155

Summary.....	156
3.1 Issue of atmospheric interference	157-158
3.1.1 Relative atmospheric correction techniques	158-163
3.1.2 Absolute methods	163-167
3.1.3 Other factors.....	167
3.1.3.1 Effect of cross-track illumination	167-168
3.1.3.2 Effect of change in zenith angle	168-169
3.2 Data redundancy	169-183
3.3 Image classification	184-190
References	191-194

Chapter 4-Role of spatial and spectral resolutions on vegetation 195

Summary	196
4.1 Optimum spectral resolution	196-205
4.2 Effect of spatial resolution	205-210
4.3 Dynamic range and definition of SNR	211-214
References	215
 Chapter 5-Summary and Conclusions	216
5.1 Inherent and experimental issues	217-220
5.2 Issues of atmospheric correction, data redundancy and image classification ..	220-222
5.3 Optimum spatial and spectral resolution	222-223
5.4 Future directions	223-224
