

## List of Tables

<b>TABLE</b>	<b>CAPTION</b>	<b>Page No.</b>
<b>Table 2.1</b>	Details of tally description available in MCNP	33
<b>Table 4.1</b>	Details of the irradiation in the present experiment	67
<b>Table 4.2</b>	Selected nuclear reactions, isotopic abundance, threshold energy of reaction, product isotope with half-life and prominent gamma ray energies with branching intensities	67
<b>Table 4.3</b>	The spectrum averaged neutron energies and respective neutron flux from two different monitor reactions	76
<b>Table 4.4</b>	The monitor reaction with the product isotope and prominent gamma lines	76
<b>Table 4.5</b>	Major uncertainties incorporated in the present cross section results	78
<b>Table 4.6</b>	Comparison of present experimental data different model predictions using TALYS – 1.8 and EMPIRE – 3.2.2	83
<b>Table 5.1</b>	Selected nuclear reactions with isotopic abundance, threshold energy, product half-life and product gamma energy with its abundance	89
<b>Table 5.2</b>	Measured Cross section for the selected nuclear reactions	99
<b>Table 6.1</b>	Selected nuclear reactions with their product isotope, half life and prominent gamma ray energies with intensities	108
<b>Table 6.2</b>	The Monitor reactions used for neutron flux measurements	108
<b>Table 6.3</b>	Comparison of measured and theoretically predicted cross section data for the present selected reactions	111
