

TABLE OF CONTENTS

ACKNOWLEDGEMENT	I
PREFACE	IV
LIST OF PUBLICATIONS	VII
Chapter 1	1-18
Introduction	
1.1 Introduction	2
1.2 Dilute Magnetic Semiconductors (DMSs)	5
1.3 Transport phenomenon in semiconductors	6
1.4 Ion Beam Irradiation	8
1.4.1 Interactions of ions with matter	9
1.4.1.1 Thermal spike model	10
1.4.1.2 Coulomb Explosion Model	10
1.5 Energy loss Mechanism	11
1.5.1 Electronic and Nuclear Energy loss	11
1.5.1.1 Electronic Energy loss	12
1.5.1.2 Nuclear energy loss	12
1.6 Motivation	14
References	15
Chapter 2	19-54
Analytical techniques employed for characterization	
2.1 Introduction	20
2.2 Sample preparation methods	20
2.2.1 Bulk sample preparation	20
2.2.1.1 Argon arc melting method	21
2.2.1.2 Vacuum sealing in quartz tube	22
2.2.2 Thin Film Fabrication Technique	23
2.2.2.1 Thermal Evaporation Technique	24
2.3 Structural studies	28
2.3.1 X-Ray Diffraction (XRD)	28
2.3.1.1 Grazing Angle X-ray diffraction (GAXRD)	29
2.4 Surface study	31
2.4.1 Atomic Force Microscope (AFM)	31
2.4.2 Scanning Electron Microscope (SEM) and Energy Dispersive X-rays Analysis (EDXA)	34
2.5 Electrical Studies	37
2.5.1 DC resistivity	37

2.5.1.1	Two Probe Method	37
2.5.1.2	Four probe Method	38
2.5.1.3	Quantum Design Physical Property Measurement System (PPMS)	41
2.6	Hall Effect Measurement	44
2.6.1	Ordinary Hall Effect	44
2.6.2	Anomalous Hall Effect	44
2.7	Mossbauer Spectroscopy	46
2.7.1	Isomer shift	48
2.7.2	Quadrupole splitting	48
2.7.3	Magnetic splitting (Zeeman splitting)	48
2.8	Magnetic force Microscopy (MFM)	49
2.9	Optical Studies	50
2.9.1	Photoluminescence (PL)	50
	References	52

Chapter 3 **55-108**

Dilute Fe doped $\text{Ge}_{1-x}\text{Sb}_x$ alloy thin film system

3.1	$\text{Fe}_{0.01}\text{Ge}_{1-x}\text{Sb}_x$ alloy thin films	56
3.1.1	Introduction	56
3.1.2	Experimental details	57
3.1.3	Structural studies	58
3.1.4	Electrical studies	59
3.1.5	AFM studies	63
3.1.6	Magnetic Force Microscopy studies	65
3.2	Effects of SHI beam on $\text{Fe}_{0.01}\text{Ge}_{1-x}\text{Sb}_x$ thin films	68
3.2.1	Introduction	68
3.2.2	Experimental details	69
3.2.3	Structural studies	70
3.2.4	Electrical studies	71
3.2.5	AFM studies	73
	References	75

Chapter 4 **80-109**

Dilute Fe doped $\text{Sb}_{1-x}\text{Se}_x$ and SbSe bi-layer thin film system

4.1	Dilute Fe doped $\text{Sb}_{1-x}\text{Se}_x$ thin films	81
4.1.1	Introduction	81
4.1.2	Experimental details	83
4.1.3	Structural studies	84
4.1.4	Electrical Studies	86
4.1.5	Photoluminescence (PL) studies	90

4.1.6	Hall Measurement	91
4.1.7	Surface morphological studies	91
4.1.8	MFM studies	93
4.2	Annealing and irradiation effects in Sb-Se bi-layer thin film	96
4.2.1	Introduction	96
4.2.2	Experimental Techniques	97
4.2.3	Structural studies	98
4.2.4	Electrical studies	101
4.2.5	EDXA studies	102
4.2.6	Microstructural studies	103
4.2.7	AFM studies	104
	References	106

Chapter 5 **110-156**

Studies of Iron doped InSb bulk and TM doped InSb films

5.1	Effect of Iron concentration variation in InSb bulk system	111
5.1.1	Introduction	111
5.1.2	Experimental details	113
5.1.3	Structural studies	114
5.1.4	Mössbauer study	117
5.2	Comparative study of transition metal doped InSb films	121
5.2.1	Introduction	121
5.2.2	Experimental details	123
5.2.3	Structural studies	124
5.2.4	Electrical Studies	125
5.2.5	Magnetotransport studies	134
5.2.6	Surface studies	139
5.2.7	MFM studies	144
5.2.8	Magnetic studies	147
	References	152

Chapter 6 **157-166**

Conclusion and Future outlook
