

Table of Contents

Acknowledgement		i
List of Abbreviations		iii
Introduction		1
Materials and Methods		26
Chapter 1	Evaluation of novel synthetic derivatives of coumarins for their anticancer activity in the A549 and NIH3T3 cell lines	54
Chapter 2	4-Fluorophenylacetamide-acetyl coumarin induces apoptosis via ROS mediated and p53 dependent caspase pathway	67
Chapter 3	Studies on A549 human lung cancer cell line and HET-CAM test revealed that 4-Fluorophenylacetamide-acetyl coumarin hinders metastasis and angiogenesis	106
Chapter 4	The 4-FPAC targets the PI3K/AKT pathway to exert its anti-proliferative, anti-metastasis, and anti-angiogenic activity in the A549 cell line	133
Chapter 5	<i>In silico</i> based Molecular docking, Drug-likeness, and DFT study for the evaluation of target-drug interaction, ADME, druggability, and chemical reactivity of 4-FPAC	145
Summary		174
Bibliography		183
Webliography		210
Annexure I	List of Primers	211
Annexure II	Publication from Thesis	214
Annexure III	Conference Certificates	252
