

Acknowledgement

Undertaking this Ph.D. has been a truly life-changing experience for me and it would not have been possible to do without the support and guidance that I received from many people. Hence, this is a small effort to express the attitude of gratitude to all of them for being with me at various stages of the long research journey.

At this moment of accomplishment, First and foremost, I would like to pay my deep sense of gratitude to my guide and the mentor, Dr. Pradeep C. Mankodi, Professor of Zoology Department, A massive thank to him for recommending such an interesting project for my thesis and for being such an amazing mentor. From the start to the end you have been there and supported me through all the ups and downs. Few words cannot describe the constant support and guidance I received from him throughout the study. His light and peaceful nature, encouraging words and constructive suggestions reflect the extract of his experience and knowledge which made my ways easy from the initial stage of the work to up to the final shape of the thesis. At the time of weakest phase of work, he performed the role of mitochondria and recharged with the power of provoking thoughts. Thank you sir, for finding me eligible to work under your guidance.

I would like to thank the Head, Department of Zoology, Prof. Dolly Kumar to allow me to use the laboratory instruments and extended necessary facilities during my research work. I thank to all the faculties of department of Zoology for their direct and indirect support during the study. I thankfully acknowledge Prof. Kauresh Vachhrajani for his suggestions during the work.

I am extremely thankful to Ministry of Earth Sciences (MoES), New Delhi for the financial support under the project entitled “Impact of Climate Change on Anthozoans along the Saurashtra Coast Gujarat”.

I have had the great fortune of joining The Maharaja Sayajirao University of Baroda because of Ms. Kinjal Parikh, my best friend. She makes known to me about to the area of research involved in the marine molecular biology lab which attracts me very first time towards the beauty of Anthozoans. Her work inspired me to take up marine ecology as topic of my research. Thank you so much for your constant motivations during all the phases of my life.

I feel blessed to have the most supportive friend and seniors without whom my Ph.D. would have been incomplete. I am grateful to Dr. Khushali Pandya, to make me understand the Anthozoa in detail regarding diversity and ecological aspects. Her valuable research regarding ecological aspects of zoanthids along the Saurashtra coast become inspired me to choose this topic for research. I am thankful to Mr. Parth Pandya for supporting me during the initial phase of my research work.

I am grateful to Ms. Nevya Thakkar and Mr. Kangkan Jyoti Sarma, who have helped me a lot during the entire phase of my research work. Both of them accompanying me at the field work and support me for sample collection and taking care during the entire study periods.

I am grateful to the contributions made by my lab mate and good friend, Ms. Jalpa Jadeja, for giving new sites to Anthozoan study using Remote sensing techniques and developing distribution maps for my study. I would like to thanks Mr. Ruzbeh Mirza and Ms. Ankita Viradia for sharing knowledge about Anthozoans, constructive suggestions and helping for statistics in my research work. I am also thankful to the my Juniors, Ms. Sheikh Gazala and Ms. Jinal Bhavsar, their dissertation work provide the lacking information required for the research work and also helped me a lot during the field work.

My deepest admiration towards my friends Ms. Barkha Purohit and Ms. Bhumi Thakkar for whenever I was indeed. They helped me in the standardization of molecular methods and also contributions in layout of ideas during my research.

The greatest strength comes from my family and merely being grateful to them will only demean their position in my life. Finally, I acknowledge the people who mean a lot to me, my parents, Mr. Nayankumar Shah and Mrs. Alpaben Shah, for showing faith in me and giving me liberty to choose what I desired. I salute you all for the selfless love, care, pain and sacrifice you did to shape my life. Although you hardly understood what I researched on, you were willing to support any decision I made. I would never be able to pay back the love and affection showered upon by my parents.

I owe thanks to a very special person, my husband, Mr. Darpit Shah for his continued and unfailing love, support and understanding during my pursuit of Ph.D. degree that made the completion of thesis possible. You were always around at times I thought that it is impossible to continue, you helped me to keep things in perspective. I greatly value his contribution and deeply appreciate his belief in me. I appreciate my little son, Panth Shah for abiding my ignorance and the patience he showed during my thesis writing. Words would never say how grateful I am to both of you.

My heart felt regard goes to in laws Mr. Kaiyalal Shah, Mrs. Jayshreeben Shah and my sister in law, Dr. Akanksha Shah for their love and moral support. I thank the Almighty for giving me the strength and patience to work through all these years so that today I can stand proudly with my head held high. I consider myself the luckiest in the world to have such a lovely and caring family, standing beside me with their love and unconditional support.

Shah Pinal N.
