

## Acknowledgment

---

This thesis is compilation of experiences and hard work for the research which I have carried out since last four years. In this time period, I have worked with many people whose contribution to my research and making this thesis in many ways deserve special mention. Here, it is great pleasure to convey my gratitude and acknowledgment to them.

Firstly, I would like to express my sincere gratitude and praise to the almighty GOD, who showered his grace in the form of knowledge and wisdom and every other way for completing this work.

The words would be less to thank my guide, Prof. Kauresh D. Vachhrajani, who introduced me to the wonderful world of crabs and fearlessly accepted me as a PhD student under his guidance and he was the main source of ideas, techniques and whole background of this work. We together experienced all the ups and downs of the routine work. We also shared happiness of success and depression of failure (only sometimes) when everything went wrong. He managed to teach me the real meaning of team work and in my opinion; he is the perfect example of perfect supervisor one can have for PhD work. It is a real pleasure to work and communicate with such a polite, honest and open-minded person.

It my great pleasure to thank my two great teachers who introduced and taught me how to do research and how to impetrate data and compilation of thesis or report. Firstly, Prof. B. Suresh, who introduced me to the world of animal ecology and biodiversity and taught me how and what to look when one spot the species. Secondly, Dr. Arun Mani Dixit, Director, CESC, Ahmedabad, who taught the methodology of scientific writing, data interpretation and result compilation.

I would like to thank Prof. P. C. Mankodi, Head, and Department of Zoology for allowing me to carry out the present work and also for sharing his research experience and wise advices to me whenever needed. I would like to express my gratitude to all my teachers in the department to educate me to carry out the present work. I also would like to thank the non teaching and

technical staff of the department for providing me great support and helping me to deal with all the departmental paper work and formalities.

I am feeling great pleasure to thank my special teachers who taught me crab taxonomy and ecological work through the virtual medium of internet and sometimes through short meeting during various conferences. I would like to thank Prof. Peter Ng of National University of Singapore, for solving my confusions in crab species identification. Prof. Michel Turkey and Dr. Reza Nadarloo of Seckenberg Biodiversity Museum, Frankfurt, Germany for allowing me to see the type specimens of brachyuran crabs available at the museum. I would like to thank Dr. Sang Kyu Lee of Korea, Dr. J. C. Mendoza of Singapore, Dr. Frahana Ghorri of Pakistan, Dr. Dwi Listyo Rahayu of Indonesia, Prof. Reimer of Japan for sharing their knowledge regarding the marine biodiversity and taxonomy. In India, I would like to thank Prof. Ajmal Khan of CAS in Marine Biology, Annamali University, Tamilnadu, Dr. M. K. Dev Roy, ZSI, Kolkata, West Bengal, Dr. A. P. Dineshbabu, Principal Scientist, CMFRI, Mangalore, Karnataka and Dr. Josileen Jose, Principal Scientist, CMFRI, Cochin Kerala for teaching me the taxonomy of various crustacean fauna through different training workshops.

My thesis is enriched by the discussion with my three friends, Mr. Abhijeet Bayani, Mr. Nikhil Modak and Dr. Dhawal Mehta, who are excellent intellectuals, philosopher and good researchers. Their research work, achievements and understanding of scientific work in ecology inspired me to carry out good work. I would like to thank my lab mates Ms Sumedha Arya, and Ms Brakha Purohit for helping me during my work. I would like to mention names of three people without whom my thesis would not look awesome. Mr. Gunjan Soni for making wonderful color plates of crab specimens, Ms Kashmira Khaire and Miss Sripriya Iyer for making wonderful sketches of crab body parts. I would like to thank my seniors Dr. Pranav Pandya, Dr. Bhavik Patel, Dr. Manan Shukla, Mr. Virag Vyas and Mr. Mayurdan Gadhvi for sharing their research experience with me and making my working comfortable.

This work would not have completed without support and help of local people and friends of Sutrapada. I would like to thank Mr. Vishal Pankahania, Mr. Kalpesh Gohel, and Mr. Goadadbha Kara for helping me during the field work and allowing and sharing their shelter and food during my stay in

Sutrapada. I would like to mention my special thanks to Mr. Ravi Vasava for catching numerous crab specimens for me and teaching me traditional way of crab capturing.

I would like to thank University Grant Commission for providing me fellowship to carry out the present work under RFSMS scheme. I would like to thank DST-SERB for providing me grant under “International Travel Grant Scheme” to attend the Crustacean Society conference at Seckenberg Museum, Frankfurt, Germany.

Finally, I would like to thank my parents for bringing me to the beautiful planet and providing me all the possible facilities, support and love which made me able to reach this stage. I would like to thank my “MAMAJI” to have faith in my abilities and providing me the second chance to study further after my terrible debut in college education. I would like to express my special thanks and gratitude to my wife and best friend Dhruva for support, cooperation and managing family issues with great understanding when I was working in the field. I would like to thank Diptididi and Baa for always welcoming me with smile and providing blessings to do good work. I owe my heartily gratitude to my sister Sandhya for providing me wise advices which helped me to come over from effect of frustration of failures during my work.

Though the list is long, but it will not be possible to name each and every people who molded the situations in my favor and helped me to complete this work. Here, I thank one and all of them with my fine sense of respect and gratitude.
