List of Appendices	<i>xi</i>
CHAPTER 1: INTRODUCTION	
1.1 Introduction	1
1.1 Characteristics and Nature of Science	2
1.3 Place of Science in Curriculum	3
1.3.1 Guiding principles for Science Curriculum	6
1.3.2 Criteria for ideal science curriculum	8
1.3.3 Aims and Objectives of science education	9
1.3.4 Aims and Objectives of science education at upper primary stage (class VI to VIII) (NCF 2005)	10
1.3.5 Local Perspective: Aims of Science Education by GCERT	10
1.4 Role of Taxonomies in Educational Objectives	11
1.4.1 Bloom's Taxonomy (1956) - A Foundational and Pioneer framework	12
1.4.2. Structure of Bloom's taxonomy for cognitive domain	13
1.4.3 Revision of Bloom's Taxonomy for Cognitive Domain	16
1.5 Taxonomy for Cognitive Domain: A Tool for Wide-Range Assessment in Science	18
1.6 Rationale	19
1.7 Statement of the Problem	21
1.8 Objectives of the Study	21
1.9 Hypotheses	21
1.10 Operationalization of the Terms	24
1.11 Explanation of The Terms	25

1.12 Delimitation of the Study	25
CHAPTER 2: REVIEW OF RELATED STUDIES	
2.0 Introduction	26
2.1 Surveys Conducted in Science Education	26
2.1.1 Construction of scientific attitude and aptitude tests	27
2.1.2 Construction of achievement tests	30
2.1.3 Construction of tests including factors, correlates and predictors of achievement	46
2.2. Experimental Studies Conducted in Science Education	58
2.3. Studies Conducted Abroad	69
2.4. Summary of Review of Related Studies	76
2.5. Implications for the Present Study	78
CHAPTER 3: METHODOLOGY OF THE STUDY	
3.0 Introduction	81
3.1 Design of the study	81
3.2 Population	81
3.3 Sample	81
3.4 Tool for data collection	82
3.4.1 Cognitive Ability Test for Science (CATS)	82
3.4.2 Creativity Test for Science (CTS)	82
3.5 Construction of Cognitive Ability Test For Science (CATS)	82
3.5.1 Content analysis	83
3.5.1.1 Chemistry	83
3.5.1.2 Physics	84
3.5.1.3 Biology	85
3.5.2 Construction of items for item pool	86
3.5.3. Experts' Validation	87
3.5.4. Pre-pilot testing	88
3.5.5. Pilot study	90
3.5.5.1 Empirical evidence	90
3.5.6 Validity, Reliability and Central Tendencies	98

3.5.7. Final administration of the test	98
3.6 Construction of Creativity Test For Science (CTS)	100
3.6.1. Content analysis	100
3.6.2. Construction of items	100
3.6.3. Experts' validation	100
3.6.4. Pilot study	101
3.6.5. Final administration of the test	101
3.7 Procedure for Data Collection	101
3.8 Data Analysis	102
CHAPTER 4: DATA ANALYSIS AND INTERPRETATION	
4.0 Introduction	103
4.1 Achievement Scores in Cognitive Ability Test For Science (Cats) if Students	103
4.2 Effect of Medium of Instruction, Gender, Type of School and Their Interactions on Achievement in Cognitive Ability Test for Science (CATS) of Class IX Students	104
4.2.1. Gender-wise Comparison of Mean Achievement Scores in CATS of Students	105
4.2.2 Medium of Instruction-wise Comparison of Mean Achievement Scores in CATS of Students	106
4.2.3 Type of school-wise Comparison of Mean Achievement Scores in CATS of Students	106
4.2.4 Effect of Interaction of Gender and Medium of Instruction on Mean Achievement Scores in CATS of Students	107
4.2.5 Effect of Interaction of Gender and Type of School on Mean Achievement Scores in CATS of Students	107
4.3 Effect of Medium of Instruction, Gender, Type of School and Their Interactions on Achievement in Chemistry of Class IX Students	108
4.3.1. Gender-wise Comparison of Mean Achievement Scores in Chemistry of Students	109
4.3.2 Medium of Instruction-wise Comparison of Mean Achievement Scores in Chemistry of Students	109
4.3.3 Type of school-wise Comparison of Mean Achievement Scores in	110

Chemistry of Students	
4.3.4 Effect of Interaction of Gender and Medium of Instruction on Mean Achievement Scores in Chemistry of Students	111
4.3.5 Effect of Interaction of Gender and Type of School on Mean Achievement Scores in CATS of Students	111
4.4 Effect of Medium of Instruction, Gender, Type of School and Their Interactions on Achievement in Physics of Class IX Students	112
4.4.1. Gender-wise Comparison of Mean Achievement Scores in Physics of Students	113
4.4.2 Medium of Instruction-wise Comparison of Mean Achievement Scores in Physics of Students	113
4.4.3 Type of school-wise Comparison of Mean Achievement Scores in Physics of Students	114
4.4.4 Effect of Interaction of Gender and Medium of Instruction on Mean Achievement Scores in Physics of Students	115
4.4.5 Effect of Interaction of Gender and Type of School on Mean Achievement Scores in Physics of Students	115
4.5 Effect of Medium of Instruction, Gender, Type of School and Their Interactions on Achievement in Biology of Class IX Students	116
4.5.1. Gender-wise Comparison of Mean Achievement Scores in Biology of Students	117
4.5.2 Medium of Instruction-wise Comparison of Mean Achievement Scores in Biology of Students	117
4.5.3 Type of school-wise Comparison of Mean Achievement Scores in Biology of Students	118
4.5.4 Effect of Interaction of Gender and Medium of Instruction on Mean Achievement Scores in Physics of Students	119
4.5.5 Effect of Interaction of Gender and Type of School on Mean Achievement Scores in Physics of Students	119
4.6 Achievement of Students in Cognitive Ability Test for Science (CATS) with respect to Level of Test Items	120
4.6.1 Achievement of Students for Remember level of CATS	121
4.6.2 Achievement of Students for Understand level of CATS	122

4.6.3 Achievement of Students for Apply level of CATS	123
4.6.4 Achievement of Students for Analyze level of CATS	125
4.6.5 Achievement of Students for Evaluate level of CATS	126
4.7 Correlation between Achievement Scores in Cognitive Ability Test for Science (CATS) and Academic Achievement in Science of Students	129
4.8 Creativity of Students	134
4.8.1 Creativity of Students in Chemistry	135
4.8.2 Creativity of Students in Physics	136
4.8.3 Creativity of Students in Biology	136
CHAPTER-5: FINDINGS AND SUGGESTIONS	
5.1 Introduction	138
5.1 Major Findings	138
5.2 Discussion	143
5.3 Suggestions	145
5.3.1 Suggestions to Policy Makers	145
5.3.2 Suggestions to Teachers	145
5.3.3 Suggestions for further Research	145
REFERENCES	146
