

# List of Tables

3.1	Target details for the neutron induced reaction cross-section measurements. . . . .	43
3.2	Listed $\gamma$ -rays along with their absolute intensities (%) for the $^{152}\text{Eu}$ source. . . . .	46
3.3	A summary of the experimental work carried out at BARC-TIFR Pelletron accelerator facility . . . . .	57
3.4	A summary of the experimental work carried out at BARC-Purnima accelerator facility . . . . .	58
3.5	Nuclear spectroscopic data for the isotopes used in the measurement of the $^{232}\text{Th}(n, \gamma)$ , $^{100}\text{Mo}(n, 2n)$ and $^{58}\text{Ni}(n, x)$ reaction cross-sections. The data are taken from the NuDat [29], Q-value calculator and Q-tool [43] data library. . . . .	61
3.6	$^{159}\text{Tb}(n, \gamma)$ reaction cross-section at different spectrum average peak neutron energies. . . . .	65
3.7	Measured and tailing corrected cross-sections for the $^{113}\text{In}(n, n')^{113m}\text{In}$ $^{115}\text{In}(n, 2n)^{114m}\text{In}$ $^{115}\text{In}(n, n')^{115m}\text{In}$ reactions. . . . .	67
3.8	Default and adjused parmeters used in the TALYS-1.9 calculations. . . . .	72
4.1	Elemental Composition of prepared concrete samples used for simulations. . . . .	88
4.2	Comparison of mass-attenuation coefficient calculated using XCOM and MCNP program of concrete samples. . . . .	97
4.3	Calculations of effective neutron removal cross-section of concrete samples. . . . .	104
1	Data sets of attributes used to obtain the detector efficiency . . . . .	116
2	Partial uncertainties in the detector efficiency . . . . .	116
3	Diagonal matrix ( $\times 10^{-3}$ ) for partial uncertainty from the attribute $C_{obs}$ ( $r=1$ ). . . . .	116
4	Covariance matrix ( $\times 100$ ) for the detector efficiency . . . . .	118
5	Measured efficiencies with correlation matrix for the sample and the monitor reaction . . . . .	122
6	Fractional uncertainty associated with all the possible parameter, which help us in obtain the uncertainty for $^{113}\text{In}(n, n')$ , $^{115}\text{In}(n, 2n)$ and $^{115}\text{In}(n, n')$ . . . . .	123
7	Fractional uncertainty associated with all the possible parameter in flux measurement of $^{27}\text{Al}(n, \alpha)^{24}\text{Na}$ . . . . .	123

8	Covariance matrix for the measured $^{113,115}\text{In}(n, xn)$ cross-sections . .	126
9	Correlation coefficients for the measured $^{113,115}\text{In}(n, xn)$ cross-sections	127
10	Uncertainty (%) present in the measured $^{113,115}\text{In}(n, xn)$ cross-sections at respective neutron energy . . . . .	127
