

Table of Content

<i>Acknowledgment</i>	I-V
<i>Abbreviation</i>	VI-VIII
General Introduction	1-36
Aim & Objectives	37-38
Materials & Methods	39-58
Chapters	
1. CORM-A1 mediated improvement in t-BHP induced Oxidative stress in hepatocyte via Nrf2 activation.	59-73
2. CORM-A1 improves acetaminophen (APAP) induced hepatotoxicity in swiss albino mice via Nrf2-ARE pathway.	74-98
3. CORM-A1 improves Nonalcoholic steatohepatitis (NASH) in HFHF fed C57BL/6J mice.	99-125
4-A. Alleviation of experimentally induced Nonalcoholic steatohepatitis (NASH) by CORM-A1: Targeting Nrf2 and antioxidant signaling	126-138 139-159
4-B. Alleviation of experimentally induced Nonalcoholic steatohepatitis (NASH) by CORM- A1: Targeting Mitochondrial biogenesis and cellular respiration.	
Summary	160-171
Bibliography	172-204
