

## *Acknowledgment*

Standing at the finale chapter of the journey embarked several years back, I would like to extend sincere and heartfelt regards to all the populaces. I feel numinous as I recall the time elapsed in the journey.

I pay a sincere gratitude to almighty for bestowing constant blessing and pouring out the opportunities as I travelled along the way and much more for enabling me to imbibe the wisdom and being competent to chisel my future.

I pay earnest regards to my mentor Dr. Ranjitsinh Devkar who taught me a lot of lessons not just in academics but of life as well. I have learned the best of his, planning, strategy making, interacting with folks, problem analysis and much more. I admire the fact that he imparts free hand to his students and let them shape their own work while he never fails to have their back. The zest he brings to the lab is just commendable. One of the most crucial things that I will always imply in my life, is his words, “lock the target and go for the kill”. He is the most understanding guide a student can ever wish for, he never let me feel the gap between a guide and a student. This support and guidance resulted in valuable accomplishments in my tenure.

I wish to acknowledge former Head, Department of Zoology; former co-guide, M.Phil program and former PI, GBB project, Prof. P.C. Mankodi. With the amount of relations I share with him, a paragraph will fail to surmise the felt acknowledgements. His help in initial days of my career just smoothened the

journey. I thank him for providing me the facility, opportunity and encouragement to work in the department.

I would also like to extend my acknowledgements to current Head, Department of Zoology, Prof. Dolly Kumar for her support. Also, I would want to thank all the teachers who put in their contributions from my undergraduate days. Prof. Geeta Padate, Prof. Kauresh Vachhrajani, Prof. Pragna Parikh, Prof. Sunita Salunke, Prof. B. Suresh and Dr. Prakash Pillai whose guidance and support over the years were noteworthy. I would also like to thank Prof. Vihas Vasu who was more than just a faculty. I highly appreciate all the scientific, unscientific interactions we had over teas/coffees. He never let me feel a distance of student and teacher. I appreciate the homely vibe he always extended.

I also pay my sincere regards to non-teaching staff of the department. Late Shree Sangeet Patel, Rajesh Nayak, Shailesh Chikne, Hemant Parmar, Hitesh Suthar, Urmilaben Patel and Gulab Yadav for their generous cooperation which lead to smooth function of administrative work.

As I meraki in my work, it was soothing to see sonders around. I would like to thank all of them for the hygge I acquired. To begin with I thank Dr. Jaymesh Thadani for his creditable contribution in initial days of my research I learnt a lot of fundamental scientific principles accompanying him. His expertise in handling laboratory animals, surgery, animal maintenance as well as in wet lab were very helpful. Further I thank all my lab mates Dr. Shweta Patel, Dr. Sarmita Jana, Kavita Shrisath, Apkesha Joshi and Aliasgar Vohra for maintaining a healthy lab

environment. I appreciate the fact that all of them were always ready to help in whichever way possible.

I also express my gratitude to Hitarthi Vyas, without her belief and combined efforts, completion of my wet lab and thesis writing work would not have been possible. I will always cherish the support and memories we shared together during my PhD tenure, which is worth more than I can express on paper.

I also would like to acknowledge Dr. Ashutosh Tripathi, Dr. Zalak Parikh, Dr. Jaldeep Laghnoja, Dr. Kedarlal Sharma, Dr. Arpita Dave, Dr. Lipi Buch and Dr. Juhi Singh, who not only shared the lab but also memories. I praise all the help rendered by PPL and VVL as and when sought. Special and heartfelt thanks to Prof. Rajesh Singh and Dr. Kishor Rajput for letting me use their lab facilities whenever requested. Also, I would like to thank Dr. Rajesh Patel, VNSGU, Surat for helping me in docking studies. Further, I would want to acknowledge all the research scholars of department of Zoology who formed a healthy scientific environment.

Some people meet in the way, get along and swiftly just change the entire trajectory of the life. They are so unaware of the contribution and the impact they have done on someone's life. I met him, Dr. Ravrajsinh N Jadeja as a B.Sc. student on a study tour. Barely did we know, this friendship that developed then was going to shape me into something completely unexpected. It was him who ignited and unleashed the potential in me, which even I was unaware of. It was him who held my finger and dropped me to the doorsteps of research. From then till now he has always had my back. Needless to say, all these wasn't possible

without the support extended by Dr. Menaka Thounaojam. She is one fine researcher who always filled in whenever Ravi bhai couldn't. My first training visit to NBRC was at her lab. My first visit to US was again in her lab. The hospitality she serves every time is absolutely commendable.

The visit paid to US was made worthy and memorable by a lot of people who were very friendly and supportive. I thank Dr. Manuela Bartoli for letting me work in her lab and for always being warm and welcoming. I would also like to thank Dr. Pamela Martin for letting me to use her lab facilities. I pay sincere regard to Bhaumik Pandya and Bartoli Lab for being cooperative and helpful in the course of time. I also acknowledge contributions of Dr. Sandeep Khurana for his constructive criticism and help rendered in planning the studies that resulted into a good publication.

I sincerely thank my fellow-mates, Kangkan Sarma, Ruzbeh Mirza, Ankit Khandelwal who made the tenure fun filled, joyous and colorful. Frequent chai visits, meetings in corridors, participation in departmental activities and much more that we shared made working place jubilant.

I pay sincere regards to my family for their constant support and encouragement. The understanding they have exhibited throughout the tenure smoothened the journey. A special heartfelt thanks to the little bundle of happiness, Durvank Upadhyay, who was a best stress reliever.

I would like to thank University Grant Commission (UGC) for providing me BSR-RFSMS fellowship that facilitated me carrying out my research work

smoothly. I would also like to thank DST-SERB for providing me travel grant to attend “The Liver Meeting, 2018” at USA.

Last but not the least I would like to thank the path and companion which has been with me for past 11 years; The Maharaja Sayajirao University of Baroda. I came here as a little boy unaware of the world out there and now I will leave this place with the doctorate degree. The journey I travelled molded me into the man I am today. The M.S. University will always be an unforgettable chapter written in my life that will be cherish throughout my life.
