

## List of Figures and Tables

### List of Figures

<b>Figures</b>	<b>Title</b>	<b>Page No.</b>
<i>Figure 1.1</i>	<i>Central nervous system (CNS)</i>	1
<i>Figure 1.2</i>	<i>Myelin sheath formation</i>	2
<i>Figure 1.3</i>	<i>Myelin sheath disruption</i>	3
<i>Figure 1.4</i>	<i>Source of Neural stem cells (NSC)</i>	5
<i>Figure 1.5</i>	<i>Neural stem cell differentiation pathway and lineage specific marker</i>	6
<i>Figure 1.6</i>	<i>Oligodendrocyte generation</i>	7
<i>Figure 1.7</i>	<i>Remyelination in the central nervous system (CNS)</i>	8
<i>Figure 1.8</i>	<i>Multiple growth factors affect the remyelination/demyelination processes</i>	10
<i>Figure 1.9</i>	<i>Neurotrophins interaction with its receptor and signalling</i>	11
<i>Figure 1.10</i>	<i>Mode of actions of estradiol and their receptors</i>	14
<i>Figure 2.1</i>	<i>Diagrammatic representation of Neural Stem Cells from Rat pups brain</i>	18
<i>Figure 2.2</i>	<i>Schematic diagram of glial cells isolation and culture: Astrocytes and Oligodendrocytes progenitor cells</i>	19
<i>Figure 2.3</i>	<i>Diagrammatic representation of Myelinating spinal cord culture from E13.5 mice</i>	21
<i>Figure 3.1</i>	<i>Neurosphere Culturing and Characterization of Neural stem cells isolated from P0 rat pups</i>	34
<i>Figure 3.2</i>	<i>Role of BDNF &amp; NGF in neural stem cell survival</i>	35
<i>Figure 3.3</i>	<i>Role of BDNF &amp; NGF in neural stem cell proliferation</i>	37
<i>Figure 3.4</i>	<i>Notch expression study to confirm triggering of gliogenesis</i>	38
<i>Figure 3.5</i>	<i>(a) NGF regulates Oligodendrocyte differentiation from NSCs</i>	40
	<i>(b) BDNF regulates Oligodendrocyte differentiation from NSCs</i>	41
<i>Figure 3.6</i>	<i>NGF and BDNF regulate Astrocytes and neuron cells differentiation from NSCs</i>	42

## List of Figures and Tables

Figure 3.7	<i>(a) Involvement of TrkA &amp; TrkB in Oligodendrocyte differentiation</i>	44
	<i>(b) Involvement of TrkA &amp; TrkB in Oligodendrocyte generation through ERK pathway</i>	45
Figure 3.8	<i>(A &amp; B) Numbers of colony after treatment of NGF and BDNF</i>	46
	<i>(C &amp; D) Morphological analysis of Neurosphere size assay with NGF treatment</i>	47
	<i>(E &amp; F) Morphological analysis of Neurosphere size assay with BDNF treatment</i>	49
Figure 4.1	<i>Morphological and Immunocytochemical characterization of oligodendrocytes developmental stages</i>	55
Figure 4.2	<i>a: BDNF – TrkB mediated OPC proliferation by BrdU assay:</i>	57
	<i>b: NGF – TrkA mediated OPC proliferation by BrdU assay:</i>	58
Figure 4.3	<i>a: Measurement of OPC cell migration mediated by BDNF- TrkB in in vitro scratch assay:</i>	60
	<i>b: Measurement of OPC cell migration mediated by NGF- TrkA in in vitro scratch assay:</i>	62
Figure 4.4	<i>NGF regulated oligodendrocytes differentiation:</i>	64
Figure 5.1	<i>Characterization of spinal cord culture of time pregnant 13.5 day mice embryo</i>	73
Figure 5.2	<i>TNF-<math>\alpha</math> induced demyelination in myelinating culture</i>	75
Figure 5.3	<i>Dose dependent effect of TNF-<math>\alpha</math> on Neurotrophins</i>	78
Figure 5.4	<i>1: BDNF potential for remyelination in TNF-<math>\alpha</math> induced demyelination in myelinating culture</i>	79
	<i>2: NGF potential for remyelination in TNF-<math>\alpha</math> induced demyelination in myelinating culture</i>	82
Figure 6.1	<i>Morphological and Immunocytochemical characterization of Astrocytes:</i>	89
Figure 6.2	<i>Effect of 17<math>\beta</math>- Estradiol on NGF and BDNF mRNA levels in rat cortical astrocytes cultures</i>	91
Figure 6.3	<i>ERK involvement in E2 mediated modulation of NGF and BDNF transcript levels</i>	93
Figure 6.4	<i>Modulatory effect of E2 and its receptors on p-ERK1/2</i>	95
Figure 6.5	<i>ER<math>\alpha</math> and ER<math>\beta</math> mediated cell viability</i>	96
Figure 6.6	<i>Role of ERK in E2 treated astrocytes cell viability</i>	97
Figure 7.1	<i>Neurotrophins (NGF &amp; BDNF) mediated regulation of CNS myelination</i>	103
