

## List of Figures

Figure No.	Title	Page No.
I	Paddy Crop Field where herbicide PE is sprayed.	11
II	Summary of previous work done in the lab	14
1.1	Plot of adjusted probits and predicted regression line of PE to <i>O.mossambicus</i>	25
1.2	Plot of adjusted probits and predicted regression line of PE to <i>O.mossambicus</i> in log10base	25
1.3	Graphs showing alterations in Jerky Movement, Hyperactivity and Restlessness of <i>O. mossambicus</i> on exposure of PE	28
1.4	Graphs showing alterations in Loss of Equilibrium, Fin Movement and Mucus Secretion of <i>O. mossambicus</i> on exposure of PE	29
1.5	Graphs showing alterations in OBF and TBF of <i>O. mossambicus</i> on exposure of PE	30
1.6	Changes in Haematological Parameter of <i>O. mossambicus</i> on exposure of PE	31
1.7	Changes in Blood Glucose and Total Serum Protein on <i>O. mossambicus</i> on exposure of PE	31
2.1	Changes in Haematological Parameter: RBC and Hb of <i>O.mossambicus</i> on exposure of PE	49
2.2	Changes in Haematological Parameter: PCV and MCV of <i>O.mossambicus</i> on exposure of PE	50
2.3	Changes in Haematological Parameter: MCHC and MCH of <i>O.mossambicus</i> on exposure of PE	51
2.4	Changes in Haematological Parameter: WBCs of <i>O. mossambicus</i> on exposure of PE	52
2.5	Changes in Biochemical Parameter: Glucose and Total Protein of <i>O.mossambicus</i> on exposure of PE	53
2.6	Changes in Biochemical Parameter: Globuline and Albumin of <i>O.mossambicus</i> on exposure of PE	54
2.7	Changes in Biochemical Parameter: Urea and BUN of <i>O. mossambicus</i> on exposure of PE	55
2.8	Changes in Biochemical Parameter: Creatinine of <i>O. mossambicus</i> on exposure of PE	56
2.9	Recovery of blood parameters. in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	60
2.10	Recovery of PCV in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	61
2.11	Recovery of MCV in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	61
2.12	Recovery of MCHC in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	62
2.13	Recovery of MCH in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	62
2.14	Recovery of WBCs in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	63
2.15	Recovery of Glucose in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	63
2.16	Recovery of Protein in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	64

2.17	Recovery of Albumin in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	64
2.18	Recovery of Globulin in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	65
2.19	Recovery of Urea in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	65
2.20	Recovery of BUN in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	66
2.21	Recovery of Creatinine in <i>O. mossambicus</i> in herbicide-free water after 28 days of exposure to sublethal concentrations of PE.	66
3.1	Hepatosomatic indices of <i>O.mossambicus</i> subjected to sub- acute concentration of PE on 7 <sup>th</sup> and 14 <sup>th</sup> Day	86
3.2	Male GSI of <i>O.mossambicus</i> subjected to sub- acute concentration of PE on 7 <sup>th</sup> and 14 <sup>th</sup> Days	87
3.3	Female GSI of <i>O.mossambicus</i> subjected to sub- acute concentration of PE on 7 <sup>th</sup> and 14 <sup>th</sup> day	88
3.4	SSI of <i>O.mossambicus</i> subjected to sub- acute concentration of PE on 7 <sup>th</sup> and 14 <sup>th</sup> days	89
3.5	KSI of <i>O.mossambicus</i> subjected to sub- acute concentration of PE on 7 <sup>th</sup> and 14 <sup>th</sup> days	90
3.6	CSI of <i>O.mossambicus</i> subjected to sub- acute concentration of PE on 7 <sup>th</sup> and 14 <sup>th</sup> days	91
3.7	CF of <i>O.mossambicus</i> subjected to sub- acute concentration of PE on 7 <sup>th</sup> and 14 <sup>th</sup> days	92
4.1	Photomicrograph 4.1 Liver histopathology	121
4.2	Photomicrograph 4.2 Liver histopathology	122
4.3	Photomicrograph 4.3 Kidney histopathology	123
4.4	Photomicrograph 4.3 Kidney histopathology	124
4.5	Photomicrograph 4.5 Gill histopathology	125
4.6	Photomicrograph 4.6 Gill histopathology	126
5.1	100X Microscopic images of erythrocytes of <i>O.mossambicus</i> exposed to PE	146
5.2	FACS Analysis in peripheral blood erythrocytes of <i>O. Mossambicus</i> exposed to PE for 7 and 14 days	147
5.3	Micronucleus and Total Nuclear Abnormalities frequencies in peripheral blood erythrocytes of <i>O.mossambicus</i> exposed to PE for 7 and 14 days	148
5.4	Nuclear Abnormalities frequencies in peripheral blood erythrocytes of <i>O.mossambicus</i> exposed to PE for 7 and 14 days.	149
5.5	FACS graph Analysis in peripheral blood erythrocytes of <i>O.mossambicus</i> exposed to PE for 7 days	150
5.6	FACS graph Analysis in peripheral blood erythrocytes of <i>O.mossambicus</i> exposed to PE for 14 days	151
5.7	Flow chat Diagrammatic presentation of the MN assay and Cell cycle analysis exposed by PE	158
