
List Of Figures

Figures	Title	Page
Figure 1.1	Different stages of oligodendrocyte maturation.	1
Figure 1.2	Role of newly generated OLGs in remyelination	3
Figure 1.3	Integrin expression during oligodendrocyte development.	7
Figure 1.4	Common signaling pathway activated by PDGFR α and integrin activation	10
Figure 1.5	Mechanisms of integrin activation	15
Figure 2.1	Flow diagram of isolation and culture of OPCs from P0-P2 day rat pups	18
Figure 3.1	Characterization of oligodendrocyte with cell specific markers	34
Figure 3.2	Physiological dose of PDGF-A (1ng/ml) require FN to stimulate OPC migration and ERK1/2 phosphorylation	35
Figure 3.3	pERK1/2 peripheral recruitment and filopodia formation.	38
Figure 3.4	pERK1/2 inhibition by U0126 significantly decreased the OPC migration and filopodia formation.	40
Figure 3.5	pERK1/2 inhibition on FN + PDGF-A affected the cell process formation.	42
Figure 3.6	Individual and combined effects of PDGF-A (10ng/ml) and FN on OPC migration	44
Figure 3.7	Individual and combined effects of PDGF-A (10ng/ml) with FN	45

	ERK1/2 phosphorylation.	
Figure 3.8	Individual and combined effects of PDGF-A (10ng/ml) with FN on F-actin staining and filopodia formation	46
Figure 4.1	Integrin expression in OPCs	58
Figure 4.2	Dose dependent effect of PDGF-A on integrin expression	60
Figure 4.3	Time dependent effect of PDGF-A(10ng/ml) on integrin expression	61
Figure 4.4	Time dependent effect of PDGF-A(10ng/ml) on PDGFR α internalization	62
Figure 4.5	Effect of PDGF receptor kinase inhibition on integrin expression and OPC migration	64
Figure 4.6	Effect of ERK1/2 inhibition on PDGFR α activation mediated integrin expression	66
Figure 4.7	Effect of actin polymerization inhibition on PDGFR α activation mediated integrin expression	68
Figure 4.8	Effect of PDGF receptor kinase inhibition on integrin expression in C6 glioma	70
Figure 4.9	Effect of attached (att) and suspended (sus) conditions on PDGFR α phosphorylation and PDGFR α - α v β 3 interaction	71
Figure 5.1	PDGF-A increased the lipid rafts in OPCs	82
Figure 5.2	Dose dependent effects of PDGF-A on F-actin staining and cell process formation	84
Figure 5.3	Effect of PDGF-A on lipid raft and actin cytoskeleton interaction	86

Figure 5.4	Role of lipid raft inhibition by FB1 on PDGF-A mediated effects on OPCs	89
Figure 5.5	PDGF-A revert the effects of M β CD on OPCs	91
Figure 5.6	Lipid raft internalization and PDGFR α - α v β 3 interactions in C6 glioma	93
Figure 6.1	Diagrammatic representation of the combined effects of PDGF-A (1ng/ml) and FN.	100
Figure 6.2	Diagrammatic representation of the effects of higher concentration of PDGF-A (10ng/ml).	104
