

LIST OF FIGURE

Sr. No	Title	Page No.
1.	Schematic representation illustrating the anatomical structure of the anterior pituitary (adenohypophysis) of the teleost pituitary gland	7
2.	GnRH I location on chromosome map.	8
3.	Kisspeptin 1 location on chromosome map.	10
4.	Kisspeptin 2 location on chromosome map.	10
5.	Chromosomal map of GtH-IIR(a) and GtH-Ir(b).	11
6.	Chromosomal map of ER-I(a) and ER-II(b).	12
7.	Chromosomal map of AR-I(a) and AR-II(b).	13
8.	Structural and functional features of GR.	14
9.	Chromosomal map of GR	14
10.	Chromosomal map of TSHr.	15
11.	Schematic representation of experiment carried out on ELISA plate for E ₂	39
12.	Schematic representation of experiment carried out on ELISA plate for 11-KT	40
13.	Schematic representation of experiment carried out on ELISA plate for Cortisol	42
14.	Represents the Graphs of plasma cortisol in female (a) and male (b) <i>O.mossambicus</i> exposed to agrochemicals.	59
15.	Represents the Graphs of plasma T ₃ in female (a) and male (b) <i>O.mossambicus</i> exposed to agrochemicals.	60
16.	Represents the Graphs of plasma T ₄ in female (a) and male (b) <i>O.mossambicus</i> exposed to agrochemicals.	61
17.	Represents the Graphs of plasma ratio of T ₃ /T ₄ in female (a) and male (b) of <i>O.mossambicus</i> exposed to agrochemicals.	62
18.	Represents the Graphs of plasma TSH in female (a) and male (b) of <i>O.mossambicus</i> exposed to agrochemicals.	63
19.	Represents the Graphs of plasma 17-β Estradiol in female (a) and male (b) of <i>O.mossambicus</i> exposed to agrochemicals	64
20.	Represents the Graphs of plasma 11-ketotestosterone in female (a) and male (b) of <i>O.mossambicus</i> exposed to agrochemicals.	65
21.	1.5% Agarose gel image of total RNA isolated. M-Marker, P1-P4-Samples	85
22.	2% agarose gene expression images of Kisspeptin 1 & 2, GnRH I-Gonadotropin Releasing Hormone, GtHir & GtHIIr-Gonadotropins Hormone Receptor, ERI& ERII Estrogen receptor. C-Control, CZ-Curzate, IMI-Imidacloprid, MN-Micronutrient Mixture, PE-Pyzosulphuron ethyl. (18srRNA was taken as the internal control).	85
23.	2% agarose gene expression images of ARI and II Androgen receptor in brain ovary and testis, PKC in hypothalamic region and MAPK2 in ovary. C-Control, CZ-Curzate, IMI-Imidacloprid, MN-Micronutrient Mixture, PE-Pyzosulphuron ethyl. (18srRNA was taken as the internal control).	86
24.	Western blot analysis of kisspeptin 1 and kisspeptin 2. β-actin was taken as internal control for densitometric analysis.	86
25.	Relative gene expression pattern of <i>GnRH-I</i> , <i>kiss1</i> , <i>kiss2</i> in brain	87

	hypothalamic region.	
26.	Relative band density of <i>Kiss 1</i> and <i>Kiss 2</i> of 4 groups compared to control	87
27.	Relative gene expression pattern of GtH-Ir, GtH-IIr in ovary and testes	88
28.	Relative gene expression pattern of ER-I, ER-II in Brain, ovary and testes	89
29.	Relative gene expression pattern of AR-I, AR-II in Brain, ovary and testes	90
30.	Relative gene expression pattern of PKC in brain hypothalamic region and MAPK2 in ovary	91
31.	2% agarose gel image with relative gene expression pattern of TSH- β r in thyroid gland	91
32.	2% Agarose Gene expression images of GR-Glucocorticoid receptor in kidney, thyroid, ovary gills, brain and liver	92
33.	Graph showing relative expression pattern of the Glucocorticoid receptor (GR) in four different groups of <i>O.mossambicus</i> exposed to agrochemicals	93
34.	Graph showing regression analysis of kiss2 and GnRH-I of <i>O.mossambicus</i> exposed to agrochemicals	98
35.	Graph showing regression analysis of kiss2 and GtH-Ir of <i>O.mossambicus</i> exposed to agrochemicals.	99
36.	Graph showing regression analysis of kiss2 and GtH-IIr of <i>O.mossambicus</i> exposed to agrochemicals.	100
37.	Graph showing regression analysis of kiss2 and ER-I of <i>O.mossambicus</i> exposed to agrochemicals.	101
38.	Graph showing regression analysis of kiss2 and ER-II of <i>O.mossambicus</i> exposed to agrochemicals.	102
39.	Graph showing regression analysis of kiss2 and AR-I of <i>O.mossambicus</i> exposed to agrochemicals.	103
40.	Graph showing regression analysis of kiss2 and AR-II of <i>O.mossambicus</i> exposed to agrochemicals.	104
