

ACKNOWLEDGEMENT

To acknowledge the gratitude towards the teachers on completion of such work is an age old tradition but I am doing so almost impulsively and out of instinctive compulsion. The foundation of this study was laid when my guide, Dr.H.C.Srivastava, the then Senior Professor and Head, Department of Anatomy, Medical College, Baroda, gave me the wonderful opportunity to work in Human Cytogenetics.

I take it as a privilege and duty to express my reverence to my most respectable guide, Dr.H.C.Srivastava, M.S.,F.A.M.S., for his valuable advice and encouragement throughout the work. His deep interest and erudition in Human Genetics was guiding force behind this work. But for his valuable suggestions and counsel at crucial points, the work would not have been what it is.

My sincere thanks to Dr.S.K.Dube, Head, Department of Anatomy, Medical College, Baroda, for his interest in the subject.

I am glad to acknowledge my indebtedness to my colleagues of the department for their invaluable help and co-operation throughout the work.

My warmest thanks are also to all doctors who referred interesting cases for the study.

I express my sincere gratitude to Dr.U.J.Modi, Dean, Medical College, Baroda, for permitting me to use all the facilities.

I thank Mr.R.R.Patel for photographic work and last but not the least to Mr.Nagarkar for neatly typing the thesis.

At the end, my gratitude to my all patients, who imparted knowledge through their sufferings - I owe them everything.

* D.C.Master
