

ACKNOWLEDGMENTS

My thanks are due to the Deans, Medical College, Baroda, for allowing me to conduct the initial experiments at the Department of Physiology. I am indebted to late Prof. Dr. J.P. Saxena and Prof. Dr. C.A. Desai for their constant encouragement and their guidance through out this work.

I am extremely grateful to Prof. Dr. Dr. h. c. H.H. Loeschcke, Institut für Physiologie, Ruhr-Universität Bochum (West-Germany) for providing me with all the facilities, in whose laboratory the major part of the experiments were carried out.

I am also thankful to Dr. H.R. Ahmad for his helpful discussions in the preparation of the manuscript, to W. Marek for his advice and cooperation during the experiments, to Miss Dimitrula Stambulache for helping me in evaluation of the records, to Mrs. Gaby Reimus for her excellent technical assistance, and Mrs. Michelle Duparc for her untiring efforts in typing the manuscript.
