

TABLES

	Page
1. Effects on heart rate of repeating doses of angiotensin at about 20-minute intervals.	28
2. Effects on heart rate of repeating doses of Pitressin at about 20-minute intervals.	32
3. Effects on heart rate of equipressor doses of angiotensin and Pitressin.	34
4. Effects of angiotensin and Pitressin on heart rate during buffering of arterial blood pressure.	36
5. Comparison of effects of angiotensin and Pitressin on heart rate as influenced by buffering of blood pressure.	37
6. Effects on heart rate and blood pressure of slow administration of angiotensin.	47
7. Effect of sinoaortic denervation on the cardioinhibitory response to angiotensin.	48
8. Effect of angiotensin on heart rate before and after sinoaortic denervation.	50
9. Cardiac accelerator effect of angiotensin on heart rate as influenced by the (i) inactivation of the sinoaortic pressoreflexes, and (ii) complete T.S. of spinal cord.	54
10. Effect of angiotensin on heart rate after the blocking of autonomic ganglia and/or after the administration of sympatholytic compounds.	57
11. A comparative study of the effect of angiotensin injection on heart rate of the same dog before and after tying the adrenal vein.	60
12. Cardiac accelerator effect of angiotensin on heart rate as influenced by a prior injection of inderal.	62
13. Cardiac accelerator effect of angiotensin on heart rate as influenced by prior injection of reserpine.	65
