

ACKNOWLEDGMENT

Very few get to work under the guidance cooperative, kind and understanding teacher. I'm the one who got opportunity to be guided by such teacher. I express profound appreciation to Dr. G. K. Hathi, Senior Professor and Head of the Physiology Department, Medical College, Faculty of Medicine, Maharaja Sayajirao University of Vadodara, Vadodara. A special thanks is owed to her for constructive suggestions and valuable guidance in critically going through the manuscript at earliest possible.

I've got the privilege to express my deep sense of gratitude to Head of the Obstetric and Gynecology Department who helped me to carry the work in their respective departments by permitting me to set the instruments and in selection of the cases.

I'm thankful to Dean, Medical College, Vadodara and Superintendent, SSG Hospital, Vadodara for granting me permission to study the cases and use hospital records and library facilities.

I thank my colleagues and staff of Physiology Department and Dr. Chandwani Ex-Professor of Physiology Department, for encouragement and suggestions and clinical staff of O & G Department from whom I have drawn information and advice on many occasions.

I'm also thankful for the assistance received from residents, postgraduate students, nurses and ward staff of O & G Department, SSG Hospital, Vadodara.

I'm indebted to my subjects without whose cooperation this work would have not been possible.

The help furnished by my wife - Dr. A. K. Pandya, Tutor in Physiology for providing suggestions throughout study and in preparation of manuscript, my daughter - Ms. Priyanka, my son - Master Soham and my parents for tremendous mental support and endurance is beyond the scope of mentioning.

I extend my grateful acknowledgement to all contributors who added greatly to completion of this work and lastly I thank God for making me complete this work.
