

#### ACKNOWLEDGEMENT:

This study was completed under the supervision of Prof. M.D. Sharma, Dean, Faculty of Commerce, Maharaja Sayaji Rao University of Baroda, Baroda. For his valuable guidance and the kind encouragement, my indebtedness to him is, indeed, great. No words are adequate enough to express my deep sense of reverance to Prof. Sharma for the intellectual stimulation, continuous encouragement, invaluable suggestions and personal involvement which have been of immense value in shaping the aim of the work.

I am also thankful to Dr. Srivastava, Sr. Economist, Bank of Baroda for providing study material needed for this study and valuable comments during the course of study.

The study has been enriched by the excellent, and, at times, provocative discussions with Prof. G.C. Maheshwar, Faculty of Management studies, M.S. University, Baroda. My sincere thanks to him.

My thanks are also due to various executives of fertilizer industry, who have given their valuable time to me to discuss the various issues and also to those who replied to my querries, which has enabled me to arrive at some of the conclusions which otherwise would not have been possible from the published datas.

My thanks are also due to the officers and staff of Maharaja Sayaji Rao University Library and The Library of the Bureau Public Enterprises, New Delhi and Fertilizer Association of India, New Delhi for the co-operation and the help received from them.

All other sources and authors who have been referred to in this study are hereby generally acknowledged.
