

LIST OF GRAPHS

Graph No.	Title	Page No.
4.1	FTIR graph of untreated and treated sisal fibers with different process	101
4.2	FTIR graph of untreated and treated ramie fibers with different process	103
4.3	X-ray diffraction of untreated and enzyme treated sisal fibers	109
4.4	X-ray diffraction of untreated and enzyme treated ramie fibers	109
4.5	EDS of untreated and treated sisal fibers	110-111
4.6	EDS of untreated and treated ramie fibers	111-112
4.7	Stress strain curve of raw and treated fibers	114
4.8	Stress strain bar graph of raw and treated fibers	114
4.9	Stress strain curve of untreated and treated yarns	117
4.10	Stress stain bar graph of untreated and treated yarns	117
4.11	GSM and air permeability of fabric with fiber strands	120
4.12	GSM and air permeability of sisal fabrics	121
4.13	GSM and air permeability of ramie fabrics	123
4.14	GSM and air permeability of fabrics using sisal and ramie yarns	125
4.15	GSM and air permeability of ramie nonwoven fabrics	126
4.16	Analysis of plain weave fabric from fiber strands	128
4.17	Analysis of plain weave fabrics	129
4.18	Analysis of different weave fabrics	131
4.19	Analysis of various double cloth weave fabrics	132
4.20	Analysis of different weave ramie fabrics	133
4.21	Analysis of different weave sisal fabrics	134
4.22	Analysis of various nonwoven fabrics	135
4.23	Analysis of various plain weave fabrics using fiber strands	137
4.24	Analysis of various plain weave fabrics	138
4.25	Analysis of different weave fabrics	139

4.26	Analysis of different double cloth weave fabrics	140
4.27	Analysis of different weave ramie fabrics	141
4.28	Analysis of different weave sisal fabrics	142
4.29	Analysis of various nonwoven fabrics	143
4.30	Analysis of different weave ramie fabrics	145
4.31	Analysis of different weave sisal fabrics	146
4.32	Analysis of ramie and sisal combination fabrics	147
4.33	Comparison between unfinished and resin finished fabric samples	151
