

List of Tables

Table No.	Title	Pg. No.
1.	Distribution of Samples	70
2.	Categorization of Faculties	75
3.	Number of Selected Sample	76
4.	Year wise distribution of sampling	77
5.	Number of Statement of ICT Competency	79
6.	Number of Statement on Attitude towards ICT	80
7.	Description of the Research Tool	81
8.	Categorization of independent variables of the study	85
9.	Minimum and Maximum obtainable scores of ICT Competency	86
10.	Scoring and Categorization of Attitude towards ICT	86
11.	Scoring a Categorization of usage of web-based learning for Overall, Soft skills and Curriculum aspects.	86
12.	Maximum & Minimum obtainable Scores of usage of Web based Learning	86
13.	Scoring and Categorization of opinion of undergraduate students regarding their Overall, Soft skills and Curriculum aspects related web-based Learning Resources	87
14.	Maximum & Minimum obtainable Scores of usage of Web based Learning	87
15.	Scoring for Opinions towards Web-based learning	87
16.	Scoring and Categorization for problems faced by Undergraduate students while using Web-based learning resources	88
17	Maximum and Minimum obtainable scores for problems faced by Undergraduate students while using Web-based learning resources	88
18	Scoring and Categorization for Suggestions given by Undergraduate students for using Web-based learning resources	88
19	Maximum and Minimum obtainable scores for Suggestions given by Undergraduate students for using Web-based learning resources	89
20	Statistical Measures used to analyze the data	89

Table No.	Title	Pg. No.
21	Frequency and Percentage Distribution of Undergraduate Students According to their Background Information	92
22	Frequency and Percentage Distribution of Undergraduate students According to Web –based learning facilities	96
23	Frequency and Percentage Distribution of Undergraduate students According to Computer Training Programme Attended	99
24	Frequency and Percentage Distribution of Undergraduate students according to their frequency of using of Computer	100
25	Frequency and Percentage Distribution of Undergraduate students according to their places to access of Computer and Internet	101
26	Frequency and Percentage Distribution of Undergraduate students according to gadget for accessing internet	104
27	Frequency and Percentage Distribution of Undergraduate students according to the type of Internet connection they were using to access the Internet	105
28	Frequency and Percentage Distribution of Undergraduate students according to their Use of the Web-based Resources provided in Computer lab of the University	107
29	Frequency and Percentage of Undergraduate students according to their ICT Competency	109
30	Frequency and Percentage of Undergraduate students according to their Attitude towards ICT	110
31	Indices Showing Attitude of Undergraduate Students towards ICT	112
32	Indices Showing ICT Competency of Undergraduate Students	114
33	Percentage Distribution of Undergraduate students according to their usage pattern of Web-based learning	116
34	T- Ratio showing Differences in Overall Use of Web-based Learning Resources amongst Undergraduate Students	118

Table No.	Title	Pg. No.
35	Analysis of Variance (ANOVA) Showing Differences in Overall Usage of Web-based learning amongst Undergraduate students in Relation with Selected Variables	119
36	Tukey's HSD comparison in overall usage of Web-based learning resources in relation with selected variables	120
37	Intensity Indices Showing Use of Web-Based Learning resources for Curriculum Aspects	122
38	T- Ratio showing Differences in Use of Web-based Learning Resources for Curriculum Aspects amongst Undergraduate Students	123
39	Analysis of Variance (ANOVA) Showing Differences in Usage of Web-based learning resources for Curriculum Aspects amongst Undergraduate Students in Relation with Selected Variables	125
40	Tukey's HSD comparison in Curriculum Aspects and their usage of Web-based learning in relation with ICT Competency	126
41	Intensity Indices Showing Use of Web-Based Learning resources for soft skill Aspects	128
42	T- Ratio showing Differences in Use of Web-based learning for Soft Skill amongst Undergraduate students	129
43	Analysis of Variance (ANOVA) Showing Differences in Use of Web-based learning resources for Soft Skill amongst Undergraduate students in Relation with Selected Variables	130
44	Tukey's HSD comparison in Soft skills Aspects and their usage of web-based learning resources in relation with selected variables	131
45	Percentage Distribution of Undergraduate Students according to their Opinions regarding the Web-based learning resources	134
46	T- Ratio showing Differences in Overall opinions of Web-based Learning Resources amongst Undergraduate Students	135

Table No.	Title	Pg. No.
47	Analysis of Variance (ANOVA) Showing Differences in Overall opinions of Web-based learning amongst Undergraduate students in Relation with Selected Variables	136
48	Tukey's HSD comparison in overall opinions of web-based learning resources in relation with selected variables	137
49	Intensity Indices Showing opinions of students regarding Web-based learning resources in reference to Curriculum Aspects	139
50	T- Ratio showing Differences in opinions of Undergraduate students about Web-based learning resources for Curriculum aspects	140
51	Analysis of Variance (ANOVA) Showing Difference in Opinions of Undergraduate Students for Web-based learning for curriculum Aspects in Relation with Selected Variables	141
52	Tukey's HSD comparison in Opinions of Undergraduate Students for Web-based learning for curriculum Aspects in Relation with Selected Variables	142
53	Intensity Indices Showing opinions of students regarding Web-based learning resources in reference to Soft skill Aspects	144
54	T- Ratio showing Differences in opinions of Undergraduate students about Web-based learning resources for Soft Skills aspects	145
55	Analysis of Variance (ANOVA) Showing opinions of Undergraduate students about Web-based learning resources for Soft Skills aspects in relation with Selected Variables	146
56	Tukey's HSD comparison of opinions of Undergraduate students for Web-based learning for Soft skills in relation with selected variables	147
57	Percentage Distribution of Undergraduate student regarding extent of problems face during using the Web-based learning resources	149
58	Intensity Indices for problems faced by Undergraduate students while using the Web-based learning resources	151

Table No.	Title	Pg. No.
59	T-ratio showing differences in problems faced by Undergraduate Students while using the Web-based learning resources in relation to selected variables	154
60	Analysis of Variance (ANOVA) showing Problems Faced by Undergraduate students while using Web-based learning resources in relation to selected variables	156
61	Tukey's HSD comparison for problems faced by undergraduate students while using Web-based learning resources in relation to selected variables	157
62	Percentage Distribution of undergraduate students suggestions while using the Web-based learning resources	157
63	Item wise Intensity Indices of Suggestions given by Undergraduate Students for Use of Web Based Resources for Learning.	161
