

No.	LIST OF TABLES	Page
1.	List of Home Science Colleges included in the present investigation	67
2.	Pattern of response of Teachers, Students and Administrators in Home Science Colleges of Agricultural and Non-agricultural Universities	75
3.	Frequency and percentage distribution indicating the background information of teachers	84
4.	Frequency and percentage distribution indicating the background information of students	89
5.	Frequency and percentage distribution including the background information of administrators	90
6.	Mean score range indicating the level of role enactment and role contentment	94
7.	Categorisation of overall mean score according to the 'N' in different roles.	95
8.	Mean score distribution showing the response of teachers towards role enactment in instructors' role	104
9.	Mean score distribution showing response of teachers towards their role contentment in instructor's role	105
10.	Mean score distribution showing response of teachers towards role enactment in communicator's role	106
11.	Mean score distribution showing response of teachers towards their role contentment in communicator's role	107

No.	LIST OF TABLES	Page
12.	Mean score distribution showing response of teachers towards role enactment in evaluator's role	108
13.	Mean score distribution showing response of teachers towards their role contentment in evaluator's role	110
14.	Percentage distribution showing the constraints in teaching as responded by teachers	112
15.	Mean score distribution showing the response of teachers towards role enactment in researcher's role	118
16.	Mean score distribution showing the response of teachers towards their role contentment in researcher's role	119
17.	Mean score distribution showing the response of teachers towards role enactment in research guide's role	120
18.	Mean score distribution showing the response of teachers towards their role contentment in research guide's role ...	120
19.	Percentage distribution showing the constraints faced by teachers involved in research as reported by teachers	121
20.	Percentage distribution showing constraints faced by teachers not involved in research as reported by teachers	122
21.	Mean score distribution showing the response of teachers towards role enactment in extension worker's role	126
22.	Mean score distribution showing the response of teacher's towards their role contentment in extension worker's role....	127

No.	LIST OF TABLES	Page
23.	Mean score distribution showing the response of teachers towards role enactment in extension work guide's role...	128
24.	Mean score distribution showing the response of teachers towards their role contentment in extension work guide's role ...	129
25.	Percentage distribution showing constraints for teachers involved in extension work as reported by teachers....	130
26.	Percentage distribution showing constraints in extension for teachers not doing extension as responded by teachers....	131
27.	Percentage distribution of Physical constraints as responded by teachers	133
28.	Mean score distribution showing the response of students towards role enactment by teachers in instructors' role ...	144
29.	Mean score distribution showing the role contentment of students with regards to instructors' role ...	145
30.	Mean score distribution showing the response of students towards role enactment by teachers in communicators' role ...	146
31.	Mean score distribution showing the role contentment of students regarding communicators' role ...	147
32.	Mean score distribution showing the role contentment of students regarding evaluator's role ...	148

No	LIST OF TABLES	Page
33.	Mean score distribution showing the response of students towards role enactment by teachers in evaluators' role	150
34.	Percentage distribution showing the teaching constraints reported by student as faced by teachers	152
35.	Mean score distribution showing the response of students towards role enactment by teachers in research guide's role	154
36.	Mean score distribution showing the role contentment of students regarding research guide's role	155
37.	Percentage distribution showing research constraints found by teachers as reported by students	156
38.	Percentage distribution showing the constraints for teachers not involved in research as identified by students	157
39.	Mean score distribution showing the students response towards role enactment by teachers in extension work guide's role...157	
40.	Mean score distribution showing the role contentment of students regarding extension work guide's role	159
41.	Percentage distribution showing the extension constraints faced by teachers as identified by students	161
42.	Percentage distribution showing the constraints faced by teachers not involved in extension work as identified by students..162	

No.	LIST OF TABLES	Page
43.	Percentage distribution showing the physical constraints faced by teachers as identified by students	163
44.	Mean score distribution showing the response of administrators towards role enactment of teachers in instructors' role...	176
45.	Mean score distribution showing the response of administrators' towards their role contentment regarding instructors' role	177
46.	Mean score distribution showing the response of administrator's towards role enactment of teachers in communicator's role.	178
47.	Mean score distribution showing the role contentment of administrators regarding communicator's role	179
48.	Mean score distribution showing the response of administrators towards role enactment of teachers in evaluator's role	180
49.	Mean score distribution of respondents showing the role contentment of administrators regarding evaluator's role...	182
50.	Percentage distribution showing the response of administrators towards teaching constraints faced by teachers.	184
51.	Mean score distribution showing the response of administrators towards role enactment of teachers in researchers' role	186
52.	Mean score distribution showing the role contentment of administrators regarding researchers' role	187

No.	LIST OF TABLES	Page
53.	Mean score distribution showing the response of administrators towards role enactment of teachers in research guide's role ...	187
54.	Mean score distribution showing the role contentment of administrators regarding the research guide's role ...	188
55.	Percentage distribution showing the response of administrators towards research constraints faced by teachers involved in research work ...	189
56.	Percentage distribution showing the response of administrators' towards research constraints for teachers not involved in research ...	190
57.	Mean score distribution showing the response of administrators towards role enactment of teachers in extension worker's role ...	190
58.	Mean score distribution showing the role contentment of administrators regarding extension worker's role ...	192
59.	Mean score distribution showing the response of administrators towards role enactment of teachers in extension work guide's role ...	193
60.	Mean score distribution showing the role contentment of administrators regarding extension work guide's role ...	194
61.	Percentage distribution showing the constraints for teachers not involved in extension work as reported by administrators ...	196

No.	LIST OF TABLES	Page
62.	Percentage distribution showing the extension constraints faced by teachers as reported by administrators	197
63.	Percentage distribution showing the physical constraints faced by teachers as reported by administrators	198
64.	Scores indicating consensus among respondents with regards to role enactment and role contentment in teaching, research and extension	214
65.	Scores indicating consensus among respondents with regards to role constraints faced by teachers in teaching research and extension	215
66.	Overall mean score distribution of respondents	216
67.	Mean score distribution of respondents in agricultural and non-agricultural universities	217
68.	Simple correlation scores indicating relationship between the three role dimensions	225
69.	Partial correlation scores indicating relationship between the three role dimensions	226
70.	Relationship between teachers' variables and role dimensions in the role of teaching. 231	

No.	LIST OF TABLES	Page
71.	Percentages and Chi-square value indicating relationship between the teachers' area of specialisation and role enactment in teaching	232
72.	Relationship between the role dimensions and teacher variables in the role of research	233
73.	Percentage and Chi-square value indicating the relationship between years of experience of teachers in the teaching profession and role enactment in research....	235
74.	Percentage and Chi-square value indicating the relationship between years of experience of teachers in the teaching profession and role contentment in research	235
75.	Relationship between the role dimensions and teacher variables in the role of extension	236
76.	Percentages and Chi-square value indicating relationship between area of specialisation and enactment of teachers' role in extension	237
77.	Relationship between the role dimensions and students' variables in the role of teaching	240
78.	Percentages and Chi-square value indicating the relationship between area of specialisation of students and role enactment in teaching	242

No.	LIST OF TABLES	Page
79.	Percentage and Chi-square value indicating the relationship between area of specialisation of students and role contentment in the teaching	242
80.	Percentage and Chi-square value revealing the relationship between medium of instruction at school level of students and role enactment in teaching	243
81.	Relationship between the role dimensions and students' variables in the role of research	244
82.	Percentage and Chi-square value indicating the relationship between area of specialisation of students and role enactment in research	245
83.	Percentage and Chi-square value indicating the relationship between area of specialisation of students and role contentment in research	245
84.	Percentages and Chi-square value indicating relationship between medium of instruction at school level of students and role enactment in research role... ..	246
85.	Relationship between the role dimensions and students' variables in extension role of teachers	247
86.	Percentage and Chi-square value indicating the relationship between students area of specialisation of students and role enactment in extension	248

No.	LIST OF TABLES	Page
87.	Percentage and Chi-square value indicating the relationship between area of specialisation of students and role contentment in extension	248
88.	Percentages and Chi-square value indicating the relationships between medium of instructions at school level of students and role enactment in extension	250
89.	Percentage and Chi-square value indicating the relationship between medium of instruction at school level of students and role contentment in extension	249
