

## APPENDIX - VII

Water Analysis  
(Bacteriological Quality  
of Stored Drinking Water)

| Sample<br>No.<br>----- | M.P.N. Index<br>(Per 100 ml)<br>----- |
|------------------------|---------------------------------------|
| 1                      | 2.2                                   |
| 2                      | 5.1                                   |
| 3                      | <2.2                                  |
| 4                      | 2.2                                   |
| 5                      | 2.2                                   |
| 6                      | 2.2                                   |
| 7                      | 5.1                                   |
| 8                      | <2.2                                  |
| 9                      | 5.1                                   |
| 10                     | 2.2                                   |
| 11                     | 2.2                                   |
| 12                     | 16.0                                  |
| 13                     | 2.2                                   |
| 14                     | 9.2                                   |
| 15                     | 5.1                                   |
| 16                     | 2.2                                   |
| 17                     | 2.2                                   |
| 18                     | 9.2                                   |
| 19                     | 5.1                                   |
| 20                     | 2.2                                   |
| 21                     | 5.1                                   |
| 22                     | 2.2                                   |
| 23                     | 2.2                                   |
| 24                     | 9.2                                   |
| 25                     | 2.2                                   |
| 26                     | 2.2                                   |
| 27                     | 9.2                                   |
| 28                     | <2.2                                  |
| 29                     | 9.2                                   |
| 30                     | 16.0                                  |

Water Analysis  
(Bacteriological Quality  
of Stored Drinking Water)

| Sample<br>No.<br>----- | M.P.N. Index<br>(Per 100 ml)<br>----- |
|------------------------|---------------------------------------|
| 51                     | 5.1                                   |
| 52                     | 5.1                                   |
| 53                     | 2.2                                   |
| 54                     | 9.2                                   |
| 55                     | 9.2                                   |
| 56                     | 9.2                                   |
| 57                     | 9.2                                   |
| 58                     | 5.1                                   |
| 59                     | 16.0                                  |
| 60                     | 5.1                                   |
