

APPENDIX - II

Table 1 : Distribution of Sample Households

Categories of socio-economic status	No. of households	Sample Expected	Sample Actual
Solvent	100	24	20
Subsistence	278	66	63
Poor	301	72	67
Extreme poor	160	38	50
	839	200	200

Initially it was decided to select total sample 24 from solvent, 66 from subsistence, 72 from poor and 38 from extreme poor category of household according to the proportionate random sampling process. But during data collection, due to some inevitable circumstances the actual number of households was modified slightly from the expected number (as shown in above table).
