

LIST OF FIGURES

Figure No.	Title	Page No.
1.	Research Design of the Study	86
2.	Variables for Selected Builders	87
3.	Variables of Selected Home Owners	88
4.	Schematic Framework to Show Hypothetical Relationship among Variables under Study	89
5.	Unit of Inquiry	94
6.	Sections of a Questionnaire for Selected Builders	97
7.	Section of a Questionnaire for Selected Home Owners	100
8.	Observation Checklist for Assessment of Selected Houses	101
9.	Establishment of Content Validity of the Scales	102
10.	Percentage Distribution of the builders according to their Age, Education and Duration of time working as Builder	117
11.	Percentage Distribution of respondents according to Source of Information Regarding Green Buildings	119
12.	Percentage Distribution of respondents according to their Extent of Exposure to Different Sources of Information	120
13.	Percentage Distribution of respondents according to their Level of Familiarity with the Concepts and Methods of Green Buildings	121
14.	Percentage Distribution of the respondents according to Extent of Influence of Green Building Concept on Builders	122
15.	Percentage Distribution of respondents according to incorporation of Green Building elements in various kinds of Project undertaken by them	123
16	Percentage Distribution of respondents according to extent of incorporation of Green Building aspects in the projects undertaken by builders	125
17	Percentage Distribution of respondents according to the rank of importance given by them for Green Building Aspects	126
18	Percentage Distribution of the respondents according to their extent of Opinion regarding Green Buildings	130
19	Percentage Distribution of respondents according to Extent of Influence of Reasons for Adopting Green Building Design and Construction	136
20	Weighted Mean for the reasons for adopting green building concept	137
21	Percentage Distribution of the respondents according to the extent of barriers faced in adopting Green Building design and construction	144

Figure No.	Title	Page No.
22	Weighted mean for the barriers faced by the builders in Adopting Green Building Concept	145
23	Percentage Distribution of respondents according to Decisions taken regarding the Purchase / Construction of the House	147
24	Percentage Distribution of the respondents according to their Gender	148
25	Percentage Distribution of respondents according to Age	149
26	Percentage Distribution of respondents according to their Education	150
27	Percentage Distribution of respondents according to their Occupation	150
28	Percentage Distribution of respondents according to their Total Monthly Family Income	151
29	Percentage Distribution of the respondents according to their Type of Family	152
30	Percentage Distribution of the respondents according to their Size of Family	152
31	Percentage Distribution of the respondents according to their Type of House	153
32	Percentage Distribution of respondents according to Year of Purchase or Construction of their House	154
33	Percentage Distribution of respondents according to extent of their Knowledge on various aspects of Green Building	168
34	Weighted mean for the Extent of Knowledge on various aspects of Green Building: For sub scales and total	170
35	Percentage Distribution of according to “Extent of Greenness” of the selected houses	204
36	Weighted mean for the “Extent of Greenness” of the selected houses	205
37	Distribution of Respondents according to their extent of knowledge regarding various aspects Green Building before and after the exposure to the Education Program: An Overall View	222
38	Weighted mean for the extent of knowledge regarding various aspects of Green building before and after the administration of the educational program	223
39	Revised Conceptual Framework on the basis of findings of the study	241
