

List Of Tables

Tables		Page
2.01	Prevalence Of Anaemia In India And Abroad.	12
2.02	Prevalence Of Anaemia In Different Age And Sex Groups.	13
2.03	Hb Changes And Incidence Of Moderate And Severe Anaemia In Slum Pregnant Women.	13
2.04	Eitological Factors In Iron Deficiency Anaemia.	17
2.05	Iron Containing Compounds In A 55 kg Woman (Approx).	17
2.06	Iron Losses During Pregnancy in a 55 kg Iron Replete Woman.	22
3.01	Parameters For The Study.	73
4.01	Health Problems Faced By The Women During Pregnancy.	86
4.02	Women's Beliefs Regarding Role of Diet During Pregnancy.	89
4.03	Factors Delaying Treatment Seeking For "Weakness".	94
4.04	Symptoms For Which Health Care Was Usually Sought.	94
4.05	Reasons For Non-Consumption Of Iron Tablets	99
4.06	Knowledge of Mothers	118
4.07	Knowledge of Mother-In-Law	123
4.08	Knowledge Of AWW	128
4.09	Receipt And Compliance Of Iron Tablets From Various Sources For Different Durations Of Women's Stay In The Study.	136
4.10	Percentage Distribution Of Women According To Full And Partial Receipt And Consumption Of Iron From All Sources At Different Duration Of Women's Stay In the Study.	138

4.11	Receipt And Compliance of Iron Tablets from various Sources at Different Stages of Gestation.	143
4.12	Mean Receipt And Compliance For Iron Tablets* From Private Dr. At Different Durations Of Women's Stay In The Study.	145
4.13	Percent Distribution of Women According to Full and Partial Receipt And Consumption of Iron From Private Doctors At Different Duration Of Women's Stay In the Study.	147
4.14	Mean Receipt And Compliance For Iron Tablets From Government Sources At Different Duration Of Women's Stay In The Study.	150
4.15	Percent Distribution Of Women According To Full And Partial Receipt And Consumption Of Iron From Govt. Source At Different Duration Of Women's Stay In The Study.	151
4.16	Reasons For Non-Compliance For Iron Preparation By The Subjects At Different Stages Of Pregnancy.	154
4.17	Various Side Effects Experienced By Women At Different Stages Of Pregnancy.	156
4.18	Beneficial Effect Of Iron Supplements As Perceived by Women At Different Stages Of Pregnancy.	159
4.19	Influence of Various Factors Influencing Compliance of Iron Tablets By The Women	167
4.20	The Selection Of Centres For The study.	185
4.21	Enrolment Profile Of The Subjects And Dropouts.	185
4.22	Reasons For Dropouts Of The Subjects.	186
4.23	Socio-Economic Profile Of The Subject	189
4.24	Utilization Of Health Services Prior To Enrollment	195

4.25	Past Obstetetic History Of Women.	198
4.26	Mean Gestational Age, Anthropometry And Hb Of Subjects At First Contact.	202
4.27	Precent Prevelance of Anaemia Among Pregnant Women At Different Stages Of Gestation.	207
4.28	Effect Of Number Of Tablets Consumed On the Haemoglobin Level Of Women.	214
4.29	Gain In Haemoglobin Content Of Subjects With Different Levels Of Haemoglobin At First Contact.	216
4.30	Mean Weight Of Pregnant Women At Different Stages Of Gestation.	224
4.31	Mean Weight Gain (kg) Of All The Fully Followed Subjects.	224
4.32	Weight Gain In Relation To Different Levels Of Tablet Consumption.	227
4.33	Weight Gain Per Week In Relation To Different Levels Of Tablet Consumption.	227
4.34	Effect Of Number of Tablets Consumed By The Women On Birth Weight Of The Infants.	231
4.35	Effect Of Prevelance Of Anaemia At 1st Contact On Infant Birth Weight.	232
4.36	Effect Of Prevelance Of Anaemia At Last Contact On Infant Birth Weight.	232
4.37	Relation Between Prevelance Of Anaemia And LBW.	232
4.38a	Factors Affecting Birth Weight - Regression Analysis.	234
4.38b	Factors Affecting Birth Weight Regression Analysis.	234

4.39	Number Of Women Experiencing Gastro Intestinal Morbidities.	238
4.40	Number Of Women Experiencing Pregnancy Related Morbidities.	239
4.41	Number Of Women Experiencing Anaemia Related Morbidities.	241
4.42	Number Of Women Experiencing Urinary/Genital Tract Related Morbidities.	241
4.43	Number Of Women Experiencing Infectious Morbidities.	242
4.44	Number Of Women Experiencing Miscellaneous Morbidities.	244
