

## LIST OF FIGURES

Figure No.	Title	Page No.
2.5.1	Sources of food borne disease outbreaks reported to the CDC during the period 1998-2004.	13
2.8.1	Mechanisms by which produce can become contaminated with pathogenic microorganisms	39
4.1	Study plan indicating the five phases of the study	44
4.6.4	Serial dilution and plating technique used for microbial determination in coriander leaves	81
5.1.1.1	Gender of the respondents belonging to the structured and unstructured units	86
5.1.1.2	Age of the respondents of the Structured and Unstructured units	86
5.1.2.1	Sitting capacity of the structured and unstructured units	91
5.1.2.2	Mode of lighting of the structured and unstructured units	91
5.1.2.3	Information on the source of water supply at site of the food service establishments	92
5.1.2.4	Information on the availability of water purifier in working condition	92
5.1.2.5	Responses regarding willingness to undergo training	93
5.1.3.1	Information on the storage practices for semi perishables at room temperature and under chilling	96
5.1.3.2	Information on the storage practices for high risk foods at room temperature and under chilling	96
5.1.4.1	Ranking of the food handlers based on their knowledge scores	99
5.1.5.1	Ranking of the food handlers based on their practice scores	103
5.3.1.1	Educational status of the street food vendors (N = 41)	125
5.3.1.2	Migration status of the street food vendors (N = 41)	125
5.3.1.3	Information regarding age of employees and food service as main the main occupation of street food vendors (N = 41)	126
5.3.2.1	Information on the mode of lighting of street food units (N =41)	127
5.3.2.2	Information regarding the cover available for push cart of street food units (N = 41)	127
5.3.2.3	Types of disposables used by the street food vendors (N = 41)	129
5.3.2.4	Types of serving utensils used by the SFVs (N = 41)	129
5.3.2.5	Method followed by the street food vendors (N = 41) for mixing food stuffs	130
5.3.2.6	Mode of water supply for the street food units (N = 41)	130
5.3.2.7	Willingness of the SFVs to undergo Food Safety Training	131
5.3.3.1	Mean % scores of knowledge of the street food vendors (N=41) before and after the food safety education	138
5.3.3.2	Ranking of the SFVs (N = 41) based on their knowledge scores before and after intervention	138
5.3.4.1	Impact of Food safety education on the mean % scores of practices of street food vendors (N=41)	142
5.3.4.2	Ranking of the SFVs (N = 41) based on their practice scores before and after intervention	143
5.3.5.1.2	Impact of training on total scores and various practices i.e. FH, PH, UH and EH followed by 40 SFVS	149
5.3.5.2.1	Ranking of the street food vendors based on their total scores before and after follow up training on food safety	151
5.4.1.1	Age of the restaurants	162

<b>Figure No.</b>	<b>Title</b>	<b>Page No.</b>
5.4.1.2	Number of employees engaged n the restaurants	162
5.4.1.3	Number of customers eating in restaurants on daily basis	163
5.4.2.1	Educational status of the restaurant owners	164
5.4.2.2	Experience of the restaurant owners	164
5.4.3.1	Work distribution amongst the food handlers	165
5.4.3.2	Educational status of the food handlers	166
5.4.4.1	Storage of various food materials at room temperature	167
5.4.4.2	Storage of various food materials at chilling temperature	168
5.4.5.1	Willingness of the owners to undergo food safety training	169
5.4.6.1	Willingness of the food handlers to undergo food safety training	170
5.4.6.2	Responses of the food handlers on getting better job and wages after receiving training	171
5.4.6.3	Responses of the food handlers on duration of training	171
5.4.8.1	Ranks of the owners based on their knowledge scores before and after intervention	173
5.4.9.1	Ranks of the restaurants based on the facilities before and after intervention	175
5.4.10.1	Ranks of the food handlers based on their knowledge scores before and after intervention	178
5.4.10.2	Ranks of the food handlers based on their practice scores before and after intervention	181
5.5.1.1	Mean log counts of TPC for fresh coriander before and after treatments with tap water and disinfectants	189
5.5.2.1	Mean log counts of Coliforms for fresh coriander before and after treatments with tap water and disinfectants	191
5.5.3.1	Mean log counts of <i>Staphylococcus aureus</i> for fresh coriander before and after treatments with tap water and disinfectants	194
5.5.4.1	Mean log counts of <i>Listeria monocytogenes</i> for fresh coriander before and after treatments with tap water and disinfectants	197
5.5.5.1	Mean log counts of <i>Salmonella</i> for fresh coriander before and after treatments with tap water and disinfectants	200
5.5.6.1	Mean log counts of <i>Shigella</i> for fresh coriander before and after treatments with tap water and disinfectants	201
