

## LIST OF TABLES

Table no	Table title	Page no
<b>METHODS AND MATERIALS</b>		
3.1	Parameters of Food and nutrition security assessed in the study	49
3.2	Phase I Tools and Technique	53
3.3	Infant and Young Child Nutrition (IYCN) score card	58
3.4	Hygiene and Sanitation Score Card	59
3.5	Intervention activities planned at micro and meso level	61
3.6	Intervention activities planned at exo and macro level	62
3.7	Phase II Tools and Technique	66
<b>PHASE I RESULTS AND DISCUSSION</b>		
4.1.1	Services provided by ICDS in the study area from functionaries' perspective	72-73
4.1.2	Questions asked to AWWs to assess their knowledge and the answers given by them	74
4.1.3	Opinions of AWWs regarding functioning of ICDS	75
4.1.4	Background Information of mothers	79
4.1.5	Background Information of child	80
4.1.6	Agricultural practices at household level	83
4.1.7	IFA Tablets consumption by mothers during their pregnancy	87
4.1.8	Supplementary food consumption by mothers during their pregnancy and by children (6months-3years)	90
4.1.9	Income and possession of electronic gadgets and vehicles by the Households	91
4.1.10	Weekly (Frequent) consumption of foods in the households	95-96
4.1.11	Daily consumption of various food in the households	97
4.1.12	Household dietary pattern	98
4.1.13	Infant and Young Child Nutrition (IYCN) practices	100
4.1.14	Child feeding according to age	101

4.1.15	Dietary pattern of children	102
4.1.16	Hygiene and sanitation practices among mother-child pairs	104
4.1.17	Nutritional status of enrolled mothers	105
4.1.18	Nutritional Status of Children	113
4.1.19	Prevalence of child undernutrition as per age, gender and cluster	116
4.1.20	Prevalence of MAM and SAM children as per age, gender and cluster	117
4.1.21	Association of various parameters with nutritional status of mothers	119
4.1.22	Association of various parameters with weight for height of children	120
4.1.23	Association of various parameters with height for age (stunting) of children	121
4.1.24	Correlation of household dietary pattern with weight for age of children	124
4.1.25	Association between IYCN practices of mothers and weight for age of children	126
4.1.26	Association between hygiene and sanitation practices and weight for age of children	127
4.1.27	Major predictors of Nutritional status of children (weight for age)	128
PHASE II RESULTS AND DISCUSSION		
4.2.1	Positive deviant behaviors (PDB) identification using 4 Criteria	148
4.2.2	Participant details and receptiveness of the intervention activities to improve household dietary pattern and diet diversity	152
4.2.3	Participant details and receptiveness of the intervention activities to improve Infant and Young Child Nutrition (IYCN)	153
4.2.4	Participant details and receptiveness of the intervention activities to improve Hygiene and sanitation practices	154

4.2.5	Impact of intervention on household dietary pattern	156
4.2.6	Impact of intervention on IYCN practices	160
4.2.7	Impact of intervention on Hygiene and sanitation practices	162
4.2.8	Participant details and receptiveness of the intervention activities to improve food and Nutrition Security in rural community using public-private partnership at the macro level	170-171
4.2.9	Result of paired t-test on drumstick plantation	172
