

List of Tables

Table No.	Title	Page No.
2.1.3	Nutrition analysis reports on WEP's in some countries	11
5.1.1.1	Education of subjects of forest villages of Dibrugarh, Assam	84
5.1.1.2	Occupation of subjects of forest villages of Dibrugarh, Assam	85
5.1.1.3	Income of subjects of forest villages of Dibrugarh, Assam	86
5.1.1.4	Socio Economic Status (SES) of subjects of forest villages of Dibrugarh, Assam	87
5.1.1.5	Subjects' medical condition of forest villages of Dibrugarh, Assam	88
5.1.1.6	Family medical history of forest villages of Dibrugarh, Assam	89
5.1.2	Cooking pattern of <i>Calamus tenuis</i> Roxb. shoots followed by subjects of forest villages of Dibrugarh, Assam	90
5.1.3.1	Frequency of <i>Calamus tenuis</i> Roxb. shoots consumption by the subjects of forest villages of Dibrugarh, Assam	91
5.1.3.2	Period of maximum consumption of <i>Calamus tenuis</i> Roxb. shoots during the year by subjects of forest villages of Dibrugarh, Assam	92
5.1.4	Sources of <i>Calamus tenuis</i> Roxb. shoots of the subjects of forest villages of Dibrugarh, Assam	93
5.1.5	Storage of <i>Calamus tenuis</i> Roxb. shoots by the subjects of forest villages of Dibrugarh, Assam	94
5.1.6	Therapeutic beliefs of the subjects of forest villages of Dibrugarh, Assam	95
5.1.7	Health issues beliefs on consumption of shoots of the subjects of forest villages of Dibrugarh, Assam	96
5.1.8	Association of consumption of <i>Calamus tenuis</i> Roxb. shoots with education, occupation, income, socio economic status (SES), therapeutic beliefs, health issue beliefs, subjects' medical condition, family medical history and sources of the shoots	98
5.2.1	Crude extracts of <i>Calamus tenuis</i> Roxb. shoots	103

Table No.	Title	Page No.
5.2.2	Mean percent viability of Lung carcinoma cells (A549) treated with different concentrations of various <i>Calamus tenuis</i> Roxb. shoots extracts	104
5.2.3	Mean percent viability of Breast carcinoma cells (MCF7) treated with different concentrations of various <i>Calamus tenuis</i> Roxb. shoots extracts	106
5.2.4	Biochemical analysis of the extracts for phytoconstituents screening	108
5.3.1	Fractions of MPCT extracts obtained by Column Chromatography	111
5.3.2	Mean percent viability of Lung carcinoma cells (A549) treated with different concentrations of selected MPCT fractions (F-2, F-3 and F-8) of <i>Calamus tenuis</i> Roxb. shoots	113
5.3.3	Mean percent viability of Breast carcinoma cells (MCF7) treated with different concentrations of selected MPCT fractions (F-2, F-3 and F-8) of <i>Calamus tenuis</i> Roxb. shoots	115
5.3.4	Biochemical analysis of the selected MPCT fractions (F-2, F-3 and F-8) of <i>Calamus tenuis</i> Roxb. shoots for phytoconstituents screening	117
5.4.1	Mean percent viability of human lung normal cells (L132) treated with different concentrations of MPCT and MSCT extracts of <i>Calamus tenuis</i> Roxb. shoots	120
5.4.2	Mean percent viability of human lung normal cells (L132) treated with different concentrations of MPCT extracts fractions (F-2, F-3 and F-8) of <i>Calamus tenuis</i> Roxb. shoots	121
5.5.1	Lethal Concentration (LC ₅₀) of methanolic precipitate (MPCT) and supernatant (MSCT) extracts of <i>Calamus tenuis</i> Roxb. shoot extracts against human carcinoma and normal cells	124
5.5.2	Lethal Concentration (LC ₅₀) of methanolic precipitate (MPCT) extract fractions (F2, F3 and F8) of <i>Calamus tenuis</i> Roxb. shoot extracts against human carcinoma and normal cells	125
