

SCOPE FOR FUTURE STUDIES

1. Since *Aegle Marmelos (L.) Correa* leaf is rich in antioxidant profile, various food products or supplements can be developed with various doses of leaves.
2. Herbal drinks using *Aegle Marmelos (L.) Correa* leaf in combination with different herbs or other functional foods need to be developed and studied having similar antioxidant properties.
3. Herbal *churan* (powder) of *Aegle Marmelos (L.) Correa* leaves either single or poly herbal formulation can be developed and can be checked for its efficacy in Type II diabetic subjects.
4. There is need to test the efficacy of *Aegle Marmelos (L.) Correa* leaf juice in type II diabetic subjects with different dosage for longer duration.
